Message From The Chairman of The Board of Trustees

Dear young friends, determined to “leave behind gigantic works,”

It is a great honor and joy for us to accompany you on your educational journey. We believe that education is a process that shapes both an individual’s character and sense of social responsibility. In this regard, we aim to help our students build strong personalities with a sense of direction, grounded in certain values, alongside their critical thinking approaches. Our university, rooted in principles such as “intellectual independence” and “traditional innovation,” and committed to understanding both the East and the West thoroughly, strives to build tomorrow with the heritage we have inherited. We support our students’ academic and personal development, nurturing them to become future leaders and distinguished social scientists.

We are here to help each of our students reach their fullest potential. Ibn Haldun University maintains its identity as a student-friendly institution through the principles of “student-centeredness” and “equal opportunity in education,” and it strengthens this identity day by day with the extensive scholarship opportunities it offers.

As the Board of Trustees of Ibn Haldun University, we are continuously working to establish a sustainable educational institution that will endure for centuries to come.

While striving for excellence in education, we also aim to contribute to society and serve our nation. We encourage our students to keep one foot firmly rooted in our deep-seated values while using the other to accurately interpret global developments, undertake initiatives that benefit our nation, and

expand their knowledge and experience by traveling the world through scholarship.

We value not only academic success but also spiritual and ethical principles. Our goal is to educate our students not only as professionals but also as virtuous, responsible individuals who contribute to society. As Ibn Haldun University, we regard you, our esteemed young people, who will shoulder the future of our country and nation, as a sacred trust. We prepare you for the future with trilingual education, our qualified academic staff, and the other opportunities we provide. We see our students as the social and societal architects of our new civilization. In this context, every member of our university should continue their personal development while not forgetting their social responsibilities. Together, we believe we will move confidently toward a future where the welfare of all humanity is safeguarded, guided by the light of knowledge and wisdom.

In today’s world, adopting a “glocal” approach—understanding and acting on both global and local dynamics—is of great importance. Our University, guided by this conception, offers our students both a world-class education and the opportunity to develop projects sensitive to the needs of our nation.

In Ibn Haldun University’s march towards the future, the efforts and contributions of all our members—students, administrative and academic staff, and its sponsors—are of great importance and value. We believe that together we will achieve great successes, and we thank you for being part of this great family.

Now is the time to “work like ants”...

Prof. Dr. İrfan Gündüz

Message From The President

Dear Ibn Haldun University Family,

Preparing for the future with an awareness of our historical heritage forms the foundation of our University's education, research, and social benefit-focused endeavors. The developments in our region and rapidly changing global dynamics demonstrate that only institutions with this consciousness can sustain their existence.

University education is not a goal that ends with a bachelor's or master's degree; it is a stepping stone in one's career journey. It is essential to prepare for a lifelong process of development and maturation and to equip oneself with the necessary knowledge, skills, and competencies for this journey. This requires self-awareness and the effective utilization of new opportunities.

The mission of education is to equip individuals with analytical and critical thinking, communication, digital, language proficiency, and social skills. In other words, it is to teach us how to use our thoughts and emotions most effectively, to perfect the "mind" and the "heart." Ibn Haldun University fulfills its mission as a "student-friendly" institution that serves this purpose.

Our university offers undergraduate and graduate programs specialized in social sciences, providing education that meets the requirements of our age. With its trilingual education model, academic staff, and scholarship opportunities, it strengthens its vision of nurturing future leaders.

We continue to produce projects that will increase social benefit through our innovative approaches. These projects are the result of our responsibility to contribute to society.

Dear Young Friends,

We are happy and proud to collaboratively write your success stories in the qualified undergraduate and graduate programs offered by Ibn Haldun University in the field of social sciences.

Under the leadership of our Board of Trustees, the dedicated efforts of our stakeholders and academic staff, our university is confidently moving toward the ideal of becoming a deeply rooted and widely influential educational institution for the centuries to come. We wholeheartedly believe that with the education you receive here and the skills and competencies you gain, you will produce good, beautiful, just, and lasting solutions to the problems facing humanity, and you will have a say in the future of our country and the world.

I wish you and the entire Ibn Haldun University family success.

Respectfully,

Prof. Dr. Atilla Arkan

Түт

Founding Foundation

Türkiye Youth and Education Service Foundation (TÜRGEV), our founder, was established under the guidance of our President Recep Tayyip Erdoğan, while he was the Mayor of İstanbul. The foundation, which served in İstanbul under its former name İstanbul Youth and Education Service Foundation (İSEGEV) until 2012, changed its name to Türkiye Youth and Education Service Foundation (TÜRGEV) with a view to expand its service area throughout Türkiye.

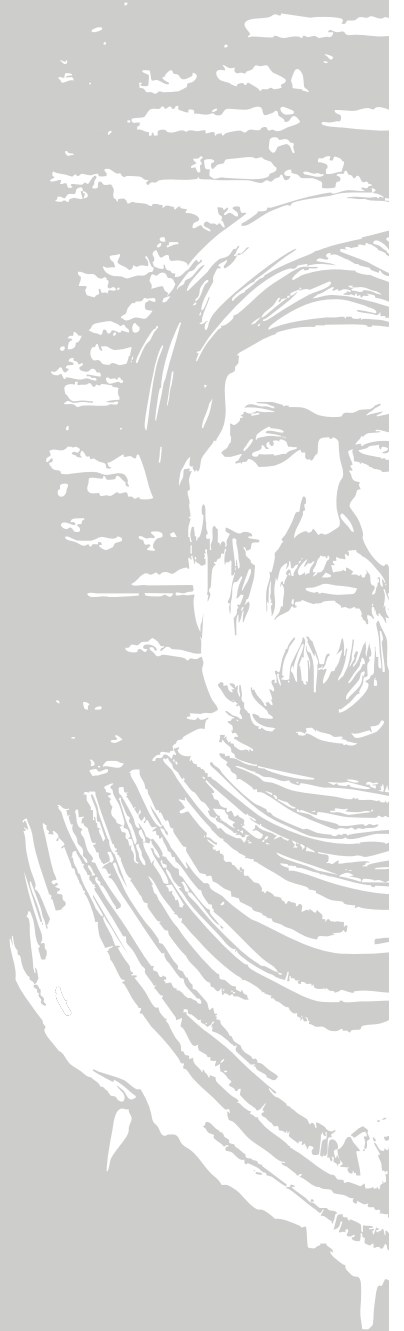

Having started to provide services with its two dormitories in İstanbul in 1996, TÜRGEV currently serves our students in 10 provinces, with its 25 student dormitories, 4 Fine Works Factories and 1 children's library as of 2024.

TÜRGEV, which embraced the principle of educating curious, inquisitive, eager to learn, productive and entrepreneurial young people who are well aware of their history, their goals and their own selves, maintains its presence throughout Türkiye, with its more than 5,000 students and more than 40,000 graduates.

TÜRGEV, which set out its journey by establishing higher education dormitories, moved on to expand its scope of service to include secondary education dormitories, Fine Works Factory (GİF) compounds and a children's library. With two locations in İstanbul, one in Ankara and one in Şırnak-Silopi, the Fine Works Factory provides workspaces, cultural activities and educational opportunities for young people. The Mevlanakapı Children's Library and Workshop Center, which enhances the interaction of our dormitories with the neighborhoods where they are located, supports the physical and mental development of children between 0-12.

About Ibn Khaldun

After whom Our University is Named

The well-known historian, sociologist, philosopher, politician, and statesman Ibn Khaldun was born in 1332 and died in 1406. He was well-educated, took lessons from many prominent scholars of the period, spent most of his life in multi-religious, multi-cultural and multi-civilizational societies such as Tunis, Algeria, Morocco, Al-Andalus and Egypt, thanks to his duties in various civil service positions.

Ibn Khaldun has closely observed not only the social orders of the cities that he lived in, but also the nomadic Arab tribes; and he lived as a member of the ruling and intellectual elite of these societies, in his capacity as a social scientist. He authored his renowned work *Muqaddimah* (Introduction) with such extensive accumulation of knowledge, observation and experiment. In fact, *Muqaddimah* consists of only one part of his comprehensive and bulky work, titled “*al-Ibar*”, which serves as a world history volume; namely its first book and introduction.

With his ideas and methods in *Muqaddimah*, which is one of the most original works in the world history of ideas, has deep impacts on the subsequent generations and scholars. It was Ibn Khaldun’s effort to render civilization, which acts within the laws of history and society, and is the result of the human will, subject of a separate field of science. This “*umran*” science bears considerable potential that could be utilized to understand the inter-civilizational relations in this global age, and to make sense of the modern multi-civilizational social experience.

Our Mission, Vision and Values

Our Mission - Our Vision

Our Mission

To educate researchers who are open to all sources of knowledge and prioritize contributing to humanity.

Our Vision

To become a respected and influential university that produces original knowledge and approaches in the field of social sciences on a global scale.

Our Values

Intellectual Independence: A country that constantly imports its ideas, theories, and methods is intellectually dependent. Intellectual dependence brings along economic, political, and cultural dependencies, and unfortunately, the education system serves the function of instilling these dependencies in the new generations. The most important aspect of intellectual dependence is social sciences. Working towards avoiding being bound by the dominant paradigm in social sciences is the first step towards liberation and originality.

Without achieving intellectual independence, full independence cannot be achieved in any field. Aim of education is to elevate new generations from imitation to analysis, and from copying to present original approaches. Only those individuals who are intellectually independent can move countries and societies towards intellectual independence. Ibn Haldun University, working in this direction, aims to render our country intellectually independent and educate intellectually independent students.

Preparing For The Future: The determining factor of the future will be a highly educated human capital with high capacity, competence, and skill levels. In the context of Türkiye, this human capital will be nurtured by reinterpreting its values in new contexts, drawing strength from universal human knowledge,

and conducting a thorough analysis of change. In this regard, educational institutions that prioritize not only knowledge transfer but also the development of students' skills and competencies through innovative practices will emerge.

Ibn Haldun University is taking confident steps towards becoming one of the few established educational institutions with a strong and widespread impact in the future. In line with this, our fundamental mission is to cultivate successful and happy individuals through quality education, generate research projects and publications with high impact value, and thereby contribute to addressing contemporary issues of our time.

Futuwwa: Ibn Haldun University has placed futuwwa at the foundation of its education. Futuwwa, which formed the basis of youth education during the Abbasid, Seljuk, and Ottoman periods in Islamic civilization, is a combination of many values that make a person truly humane, such as courage, heroism, generosity, and self-sacrifice. It is a value system primarily based on manners and etiquette. These values are universal moral virtues, and those who embody futuwwa do not discriminate based on religion, language, race, sect, or denomination. Establishing the characteristic qualities of the "ideal human" presented by our civilization on an individual level, while also striving to manage life by considering both worldly and spiritual balance, is among the essential elements of futuwwa. Ibn Haldun University believes in the adaptation and revitalization of the understanding of fütüvvat, which has manifested the morality of virtuous youth throughout the centuries and guided the youth in the right direction. Therefore, the university continues its educational activities with the conviction that futuwwa should be revived to meet the needs of the present time.

Comparative Education: Comparative education constitutes a unique and distinctive feature of Ibn Haldun University. The method of comparative education will contribute to developing awareness by recognizing and critically examining the scientific,

cultural, and artistic accumulations of world civilizations, starting with the accumulated knowledge of the civilization to which we belong. It will pass through the filter of a critical approach. Thus, one of the essential requirements for intellectual production will be fulfilled. Our educational approach is not limited to teaching social concepts and theories solely from Western sources. It embraces and equally respects the approaches and accumulations of other civilizations. This approach aims to cultivate students who are guided by the ideal of intellectual independence and is among the foundational values of a new social science education at our university.

Multilingual Education: Ibn Haldun University aims to provide its graduates with the ability to utilize the scientific traditions, methods, and concepts related to Eastern and Western civilizations within the framework of its global objectives, its mission as a research university focused on social sciences, and its principle of intellectual independence. In this regard, it is of great importance for our students to develop skills in thinking and expressing themselves in different languages and to have easier access to primary sources in different languages.

With internationally accredited language education programs, our university not only teaches languages but also provides opportunities for students to delve into the cultural and social issues that arise within those language environments, thanks to its international teaching staff.

Tradition-Based Innovation: Ibn Haldun University implements a new social science education that aims to cultivate students according to the ideal of intellectual independence. These education programs are conducted with the approach of “Tradition-Based Innovation.” In a society where imitation prevails in the name of innovation, a renewal that is free from imitation and distortion, and intellectual independence and originality in ideas and arts can only be achieved through the approach of traditional innovation.

The approach of “tradition-based innovation,” representing moderation and balance, will manifest itself in the reconstruction of our ancient heritage in harmony with tradition and contemporary developments.

Open Civilization: Open Civilization is a civilization concept that recognizes the existence and right to life of other civilizations and advocates for universal human rights. Introducing the concept of Open Civilization and its historical applications to the world, establishing a consciousness of civilization by redefining our own concept and theory of civilization as the first step, followed by developing global literacy regarding the accumulations of the world’s leading civilizations, forms the basis of our educational activities.

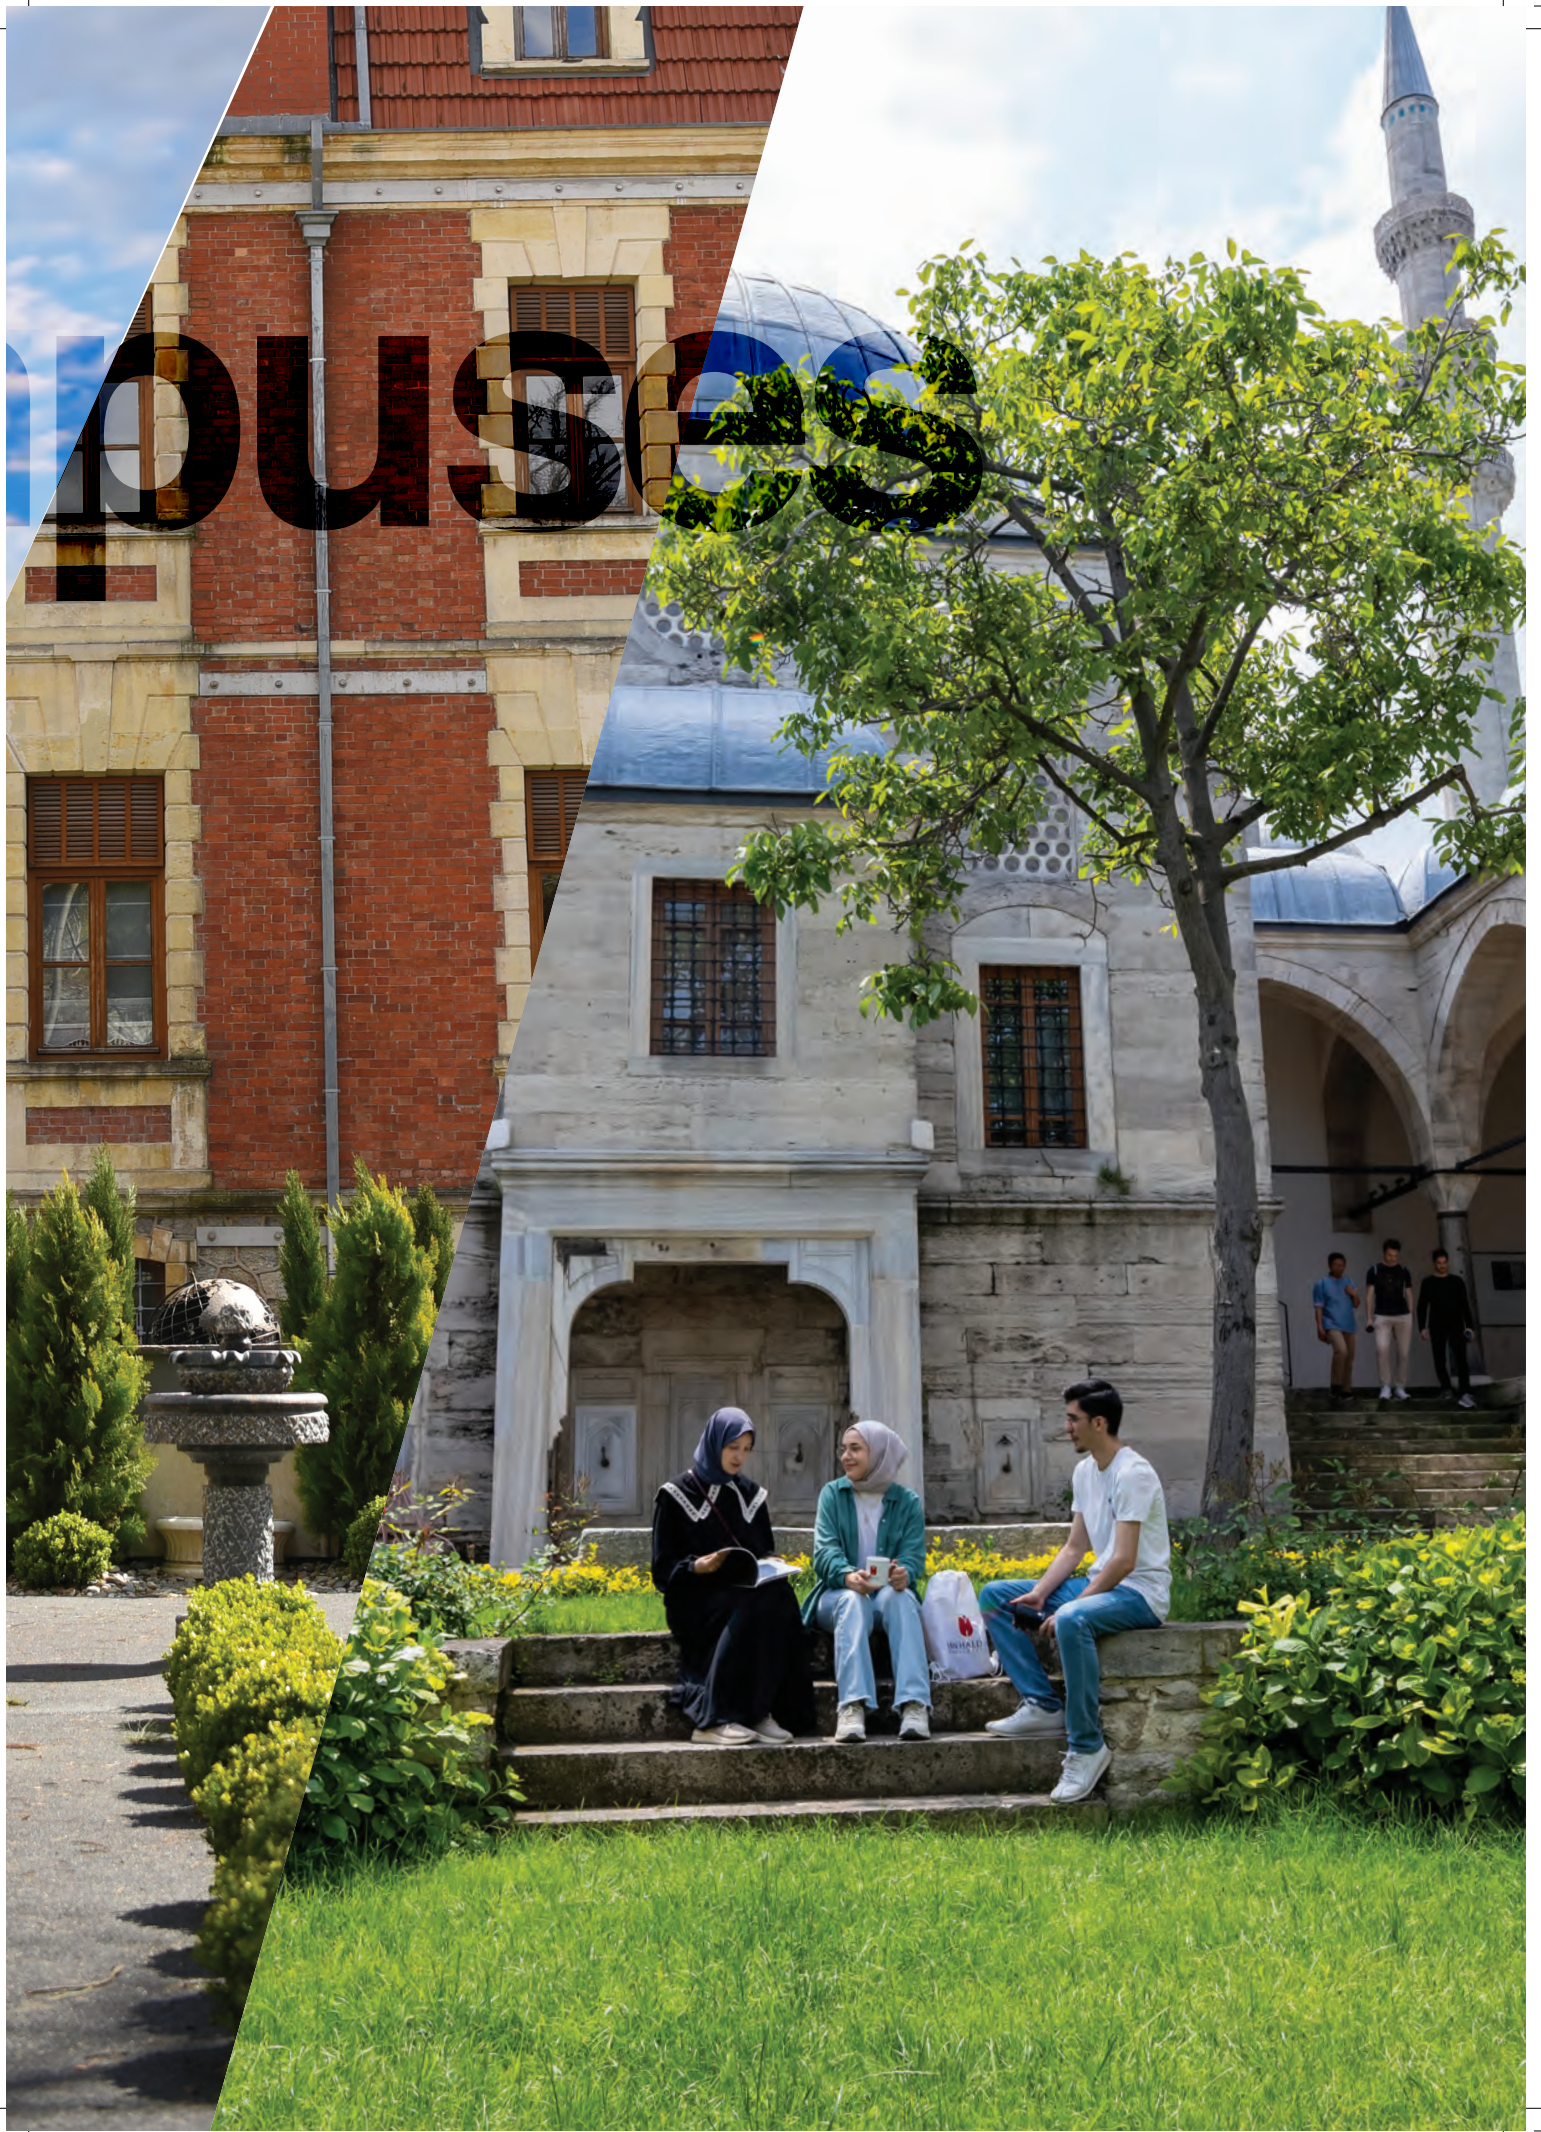

Ibn Haldun University, inspired by the historical experience and intellectual accumulation of Islamic civilization, continues its academic activities with the vision of “Open Civilization” and presents the ideal of revitalizing our civilization as an “Open Civilization” to the youth as a crimson apple or a vision for the future.

Global Competition: Ibn Haldun University provides its students with the opportunity to acquire knowledge from different perspectives in an international environment, encouraging them to think, interpret, and apply what they have learned. The university believes that gaining global literacy and the ability to accurately understand and interpret global developments are essential for global competitiveness.

With its international education environment, quality education, international connections, and collaborations, our university strengthens its identity as a “global university” each and every day. We firmly believe that establishing rich social capital during university years is crucial for building global relationships in professional, academic, political and all areas of life. Therefore, we aim to prepare our students for global competition.

Our Cam

Ibn Haldun University Complex

The Ibn Haldun University Complex has been modelled on the classical Turkish architecture in Başakşehir and put into service in 2020. With its modern faculty buildings, classrooms, congress halls, studio, amphitheater, Student Center, Sports Center, comfortable dormitories, library, and “accessible university” and “green campus” practices, social facilities and living spaces, IHU became a complete “campus university”. Ibn Haldun University Complex, with its 190,000 square meter open space and 80,000 square meter closed space, meets all the needs of students and academic staff both in curricular and extracurricular activities.

Süleymaniye Campus

The historical madrasahs that have been standing for 450 years in the Süleymaniye Complex, constructed by Sinan the Architect upon the request of Sultan Suleiman the Magnificent, and served as an educational institution for centuries, have been revitalized by Ibn Haldun University, serving as the stage for its many scholarly activities, in a location that defines the silhouette of İstanbul, “city of seven hills”. Located in the Süleymaniye Complex, which was inaugurated on October 3, 2018, the Mülazimler Madrasah, Darulhadis, Darulkurra, Salis Madrasah, and İmaret buildings are now home to some programs of the University’s Alliance of Civilizations Institute and School of Islamic Studies.

Darüşşifa

Darüşşifa

Located on our Süleymaniye Campus, the Darüşşifa is one of the historical madrasahs allocated to our University. It now serves under the umbrella of our University's Psychotherapy Application and Research Center (IPAM).

In addition to housing clinical laboratories and psychotherapy service areas, the Darüşşifa functions as an incubation center for original research and studies on Islam and Psychology, serving both our civilization and the scientific world. The Darüşşifa will also host activities geared towards international projects and collaborations in the field of Clinical Psychology.

The Süleymaniye Darüşşifası, part of the Süleymaniye Complex, was built in 1577 and served as an active healthcare center for 296 years. The Darüşşifa also functioned as a hospital where students receiving theoretical education at the Medical Madrasah applied their medical knowledge practically to patients. In this sense, the Darüşşifa continues to fulfill its historical mission within the body of Ibn Haldun University.

Süleymaniye Campus

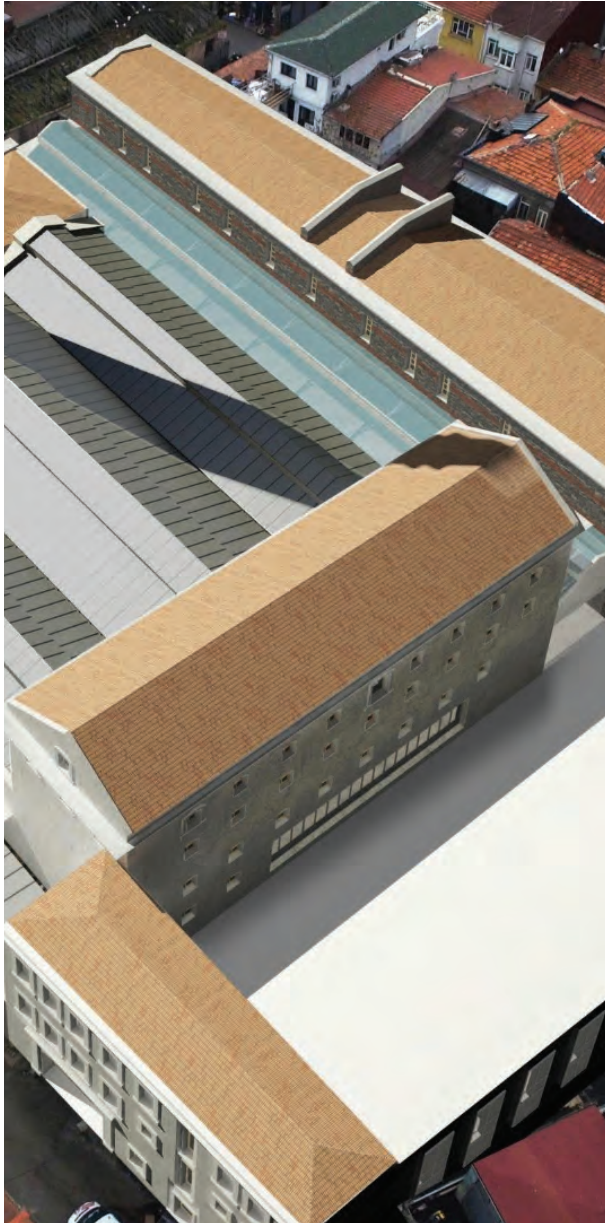

Historical Unkapanı Mill Facilities

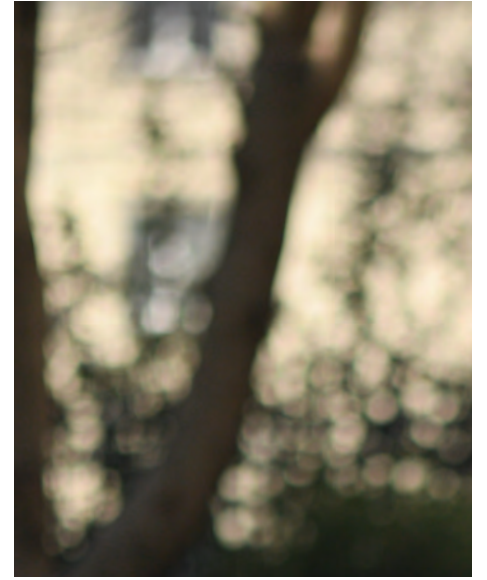

Süleymaniye Campus Historical Unkapanı Mill Facilities

The project of reviving the Historical Unkapanı Mill, one of the most important industrial cultural heritage items of İstanbul, as the Süleymaniye Campus of our University was launched on March 28, 2024. Within the framework of this restoration project, located in the center of the city, in which the existing historical texture will also be preserved; our University will have a living, developing and producing modern facility that will serve both our university members and non-University participants, with activities in various fields such as graduate education, public education programs, incubation centers for qualified project designs and foreign language education, in an area of 13,000 square meters that includes the historical Unkapanı Mill.

Taş Mektep Campus

Taş Mektep, located in the central point of Bakırköy, was built in 1874, has been restored and allocated to Ibn Haldun University. This historical building serves as the campus of our university in Bakırköy, hosting our Public Certified Training Programs at the Continuing Education Center (İHSEM), which is open to the public.

Taş Mektep Campus

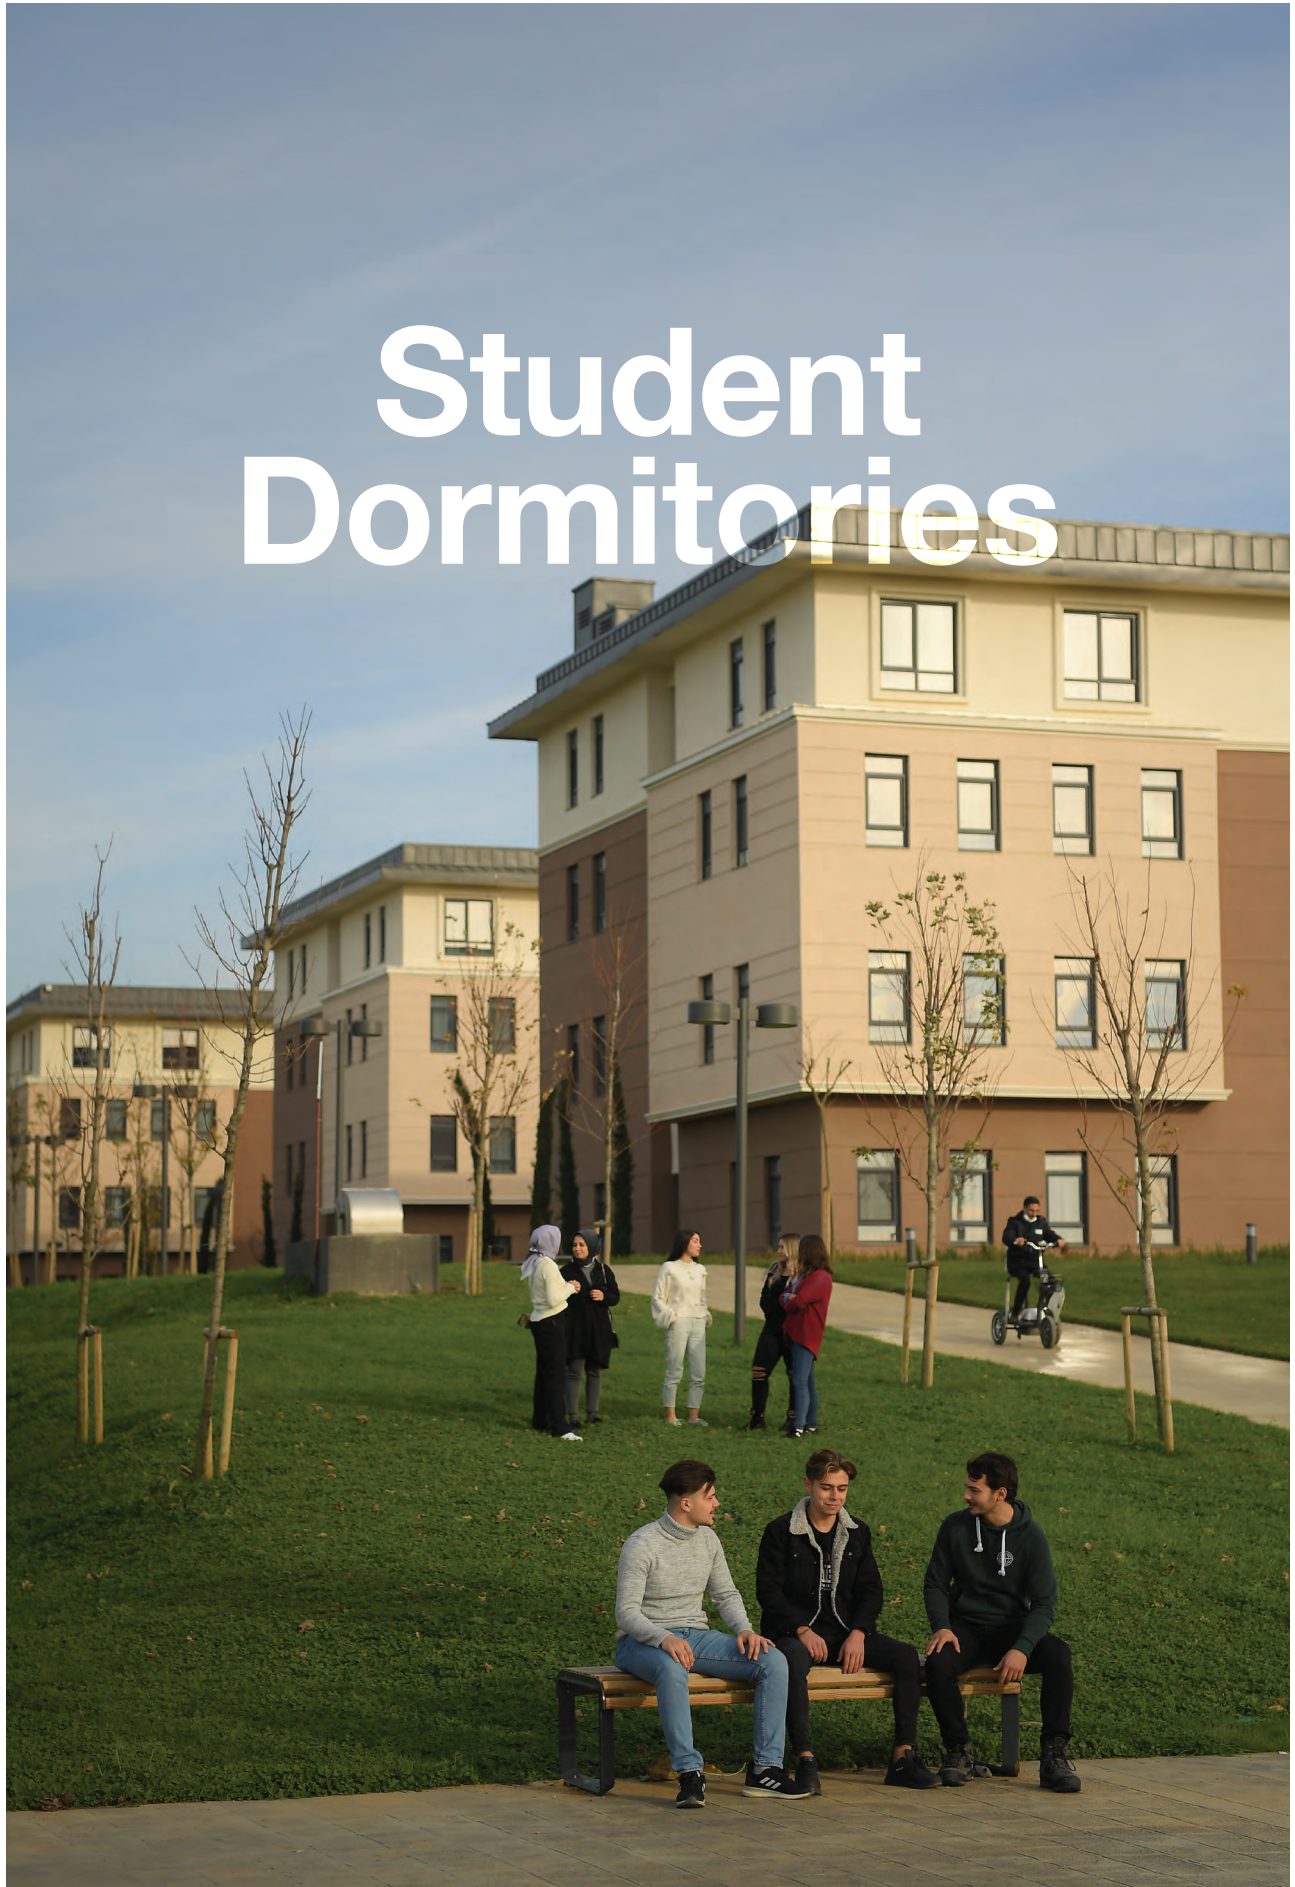

Life at Haldun

Student Dormitories

Student Dormitories

Ibn Haldun University provides a convenient, safe and comfortable living space for its students in its girls' and boys' dormitories located in its campus and Başakşehir city center. In our dormitories, where different room types are offered, our students may benefit from dedicated study areas, relaxation areas, as well as laundry and ironing rooms, masjid, arts and social activity halls and sports facilities. Shuttle service is available from the dormitories to the central locations of the city, and major transportation hubs.

Students Center

Students Center

The Students Center provides a large spectrum of services aiming at satisfying the social and cultural needs of its students and members. In this framework, the Students Center has a qualified and comfortable infrastructure in all areas that our students and Ibn Haldun University members may need in their

daily lives, from the movie theater to student club rooms, from the arts and music ateliers to events and gaming halls, from coiffeur and hairdresser services to market and dining hall, from undergraduate, graduate and academic lounge areas to activity halls.

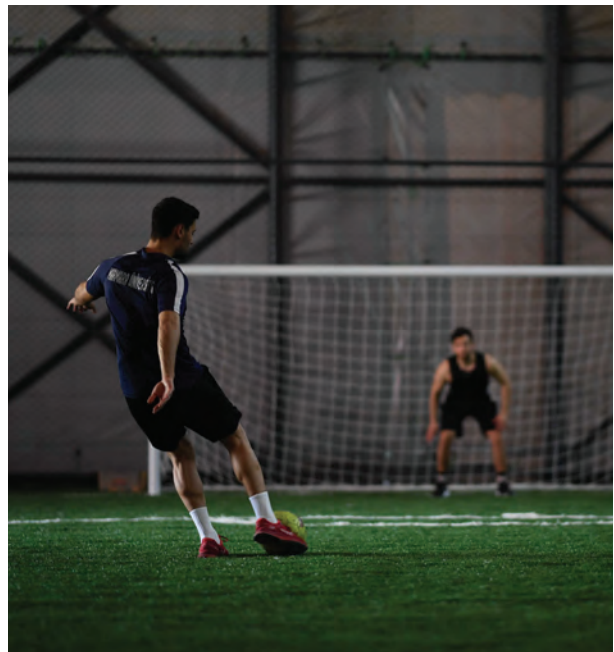

Sports Center

Within the scope of the Sports Center, a 215-seat indoor basketball court, indoor football field, indoor swimming pool, indoor tennis court, wrestling hall, fitness rooms, archery range, squash courts, sauna, steam room, and salt room, as well as open football, basketball, volleyball and tennis courts.

Distinguished from others, the Sports Center offers our members and people of the district an exclusive and enjoyable sporting experience with its archery range, squash courts, sauna, steam room, and salt room. Additionally, it provides a green and serene environment with a surrounding landscape area of 12,000 m2, where people can relax and engage in various activities. The Sports Center is equipped with amenities such as warming and changing rooms, a vitamin bar, a café, a masjid, and a first aid room, ensuring that every detail is meticulously planned and implemented.

Student Clubs

Our university provides not only quality education but also a social atmosphere where students can develop themselves through various clubs, where they can improve themselves. These student clubs, established entirely by our students, aiming to enhance individual talents, promote teamwork, and fulfill social and cultural needs by organizing extracurricular activities, which are actively continuing their activities are as follows:

- Arabic Club
- Astronomy and Space Sciences Club
- Nature Sports Club
- Literature Club
- Information and Educational Technologies Club
- Economics and Finance Club
- Handicrafts and Skills Club
- Philosophy Club
- Travel Club
- Law Club
- Islamic Civilization Club
- Career and Development Club
- Quds Studies Society
- Debate Club
- Music Club
- Archery and Horse Riding Club
- Perspective Photography Club
- Psychology Club
- Cinema Club
- Political Science Club
- Social Responsibility Club
- History and Archaeology Club
- Theater Club
- Societal Research and Thought Club
- Turkish History and Culture Research Club

Green Campus

Ibn Haldun University Complex, which has a green area of 125,000 square meters, is one of the distinguished universities of our country, with its 74 square meters of green space per student. Ibn Haldun University Complex has exceptionally beautiful trees such as holm oak, magnolia, olive, sweetgum and birch trees; and it features a fruit garden with 124 fruit trees. Furthermore, there are 44 hobby gardens in the valley called Ibn Haldun Grove, located within the Complex, and they are periodically allocated to all our members, particularly our students.

The bicycle path in our Complex, extending from the dormitories area to the schools area, is integrated to the bicycle path of Başakşehir Municipality, which is the longest one in Türkiye, and there are around 100 bicycle parks in the Complex.

Furthermore, PV panels installed on the roofs of buildings in the Ibn Haldun University Complex have been activated, thereby providing a renewable and zero-emission energy source for the University.

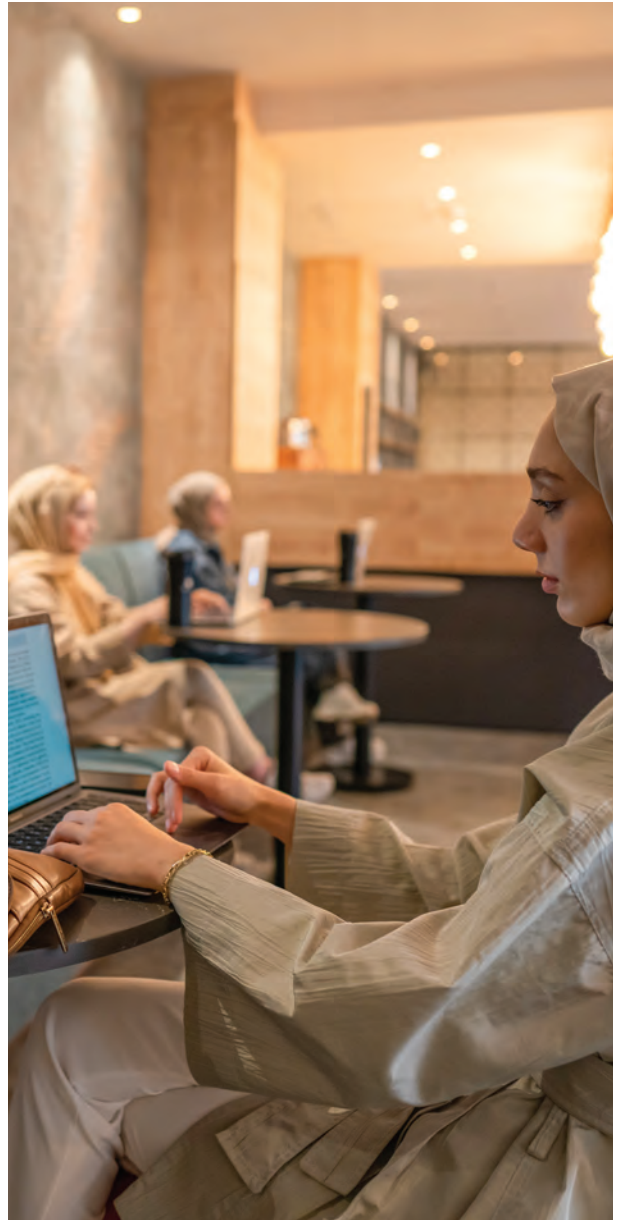

Activities aiming at increasing the environmental sensitivities of the members of our University, and to raise awareness are carried out.

Recreation and Study Areas

Our University provides facilities for our students to rest, study and spend their leisure times in a comfortable environment. In this framework, the undergraduate and graduate lounge areas, cafeteria areas in the school buildings and the Simit Sarayı enterprise located in the Media and Events Center, as well as the cafeteria located in the Sports Center, have been designed in consideration of all the comfort elements, along with the catering facilities.

Qualified areas for students have been taken into consideration in the architectural designs of the school building and desks located in these buildings have been allocated to our students who are teaching fellows, contributing to the infrastructure needed for qualified studies with the academics.

Health Services

The Health Center at Ibn Haldun University's campus is equipped with modern facilities and staffed with full-time doctors and nurses to provide free healthcare services to all members. Additionally, the Health Center regularly conducts informative sessions and organizes health seminars on topics such as "healthy living," "diseases and epidemics," "hygiene," "nutrition," and more, targeting all members of the university community.

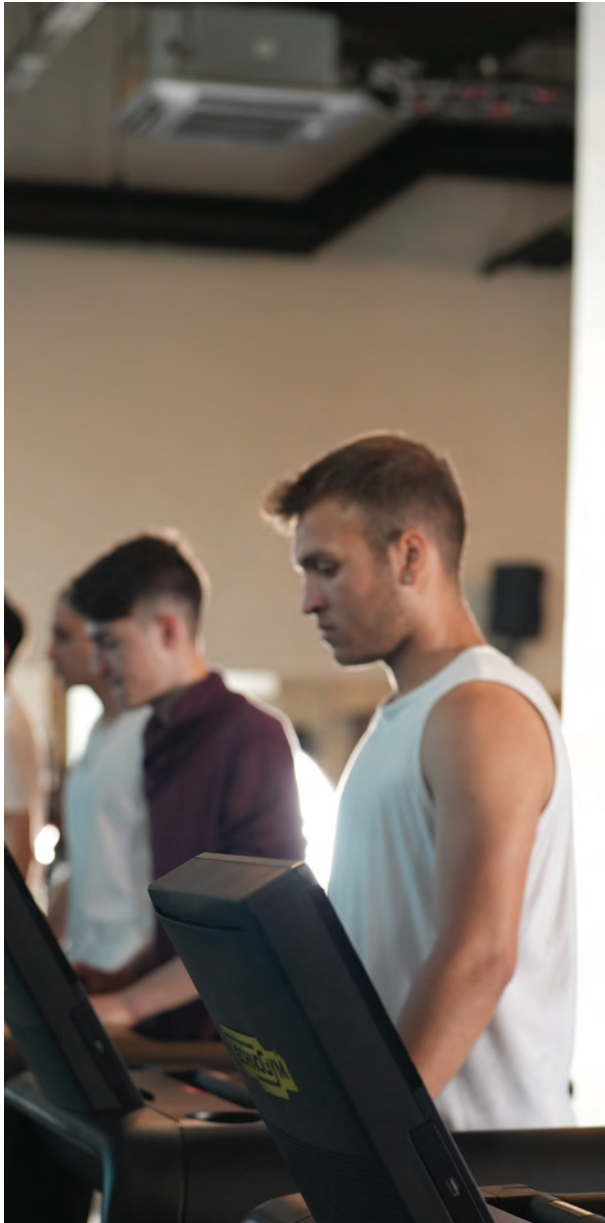

Culture-Art-Sports at IHU

At Ibn Haldun University, we aim to provide our students not only with academic knowledge but also with a cultural awareness of Türkiye and the world. At our University, various cultural activities ranging from reading groups and field trips to discussions and seminars on various topics are organized, in consideration of the students' requests, and they are provided the opportunities to capitalize on their potentials and develop their skills and capabilities with these extracurricular activities.

At our university, which puts into service its extensive sportive infrastructure to its members, trainings and activities in various sports, such as futsal, basketball, archery, horse riding, wrestling, rowing, table tennis and swimming continue, under the supervision of qualified trainers and our University teams participate in domestic and international competitions.

International Environment at Ibn Haldun

Lecturer Zaher Alrashed
School of Languages

International Events

As an international higher education institution, Ibn Haldun University organizes and hosts many large-scale international events every year, such as symposia, congresses and workshops in various fields of social sciences. Furthermore, our academic and administrative units host many prominent international academics, researchers and professionals from various parts of the world, and bring them together with our members, as well as the national public.

International Student Mobility

Our University attaches great importance to the internationalization activities, and successfully executes institutional collaboration procedures with many prominent universities and educational institutions worldwide. In this framework, our University, which successfully manages both incoming and outgoing international student mobility, opens the doors for rich career opportunities with international internship and Erasmus mobility programs.

In line with its internationalization activities, Ibn Haldun University continues to develop collaborations with institutions from different regions on the basis of common goals.

Prof. Suraiya Farooqi
Department of History

International Education Environment

According to reports published by Ibn Haldun University, the Council of Higher Education (YÖK), and other prestigious institutions, our university ranks among the top universities with the highest international student density in Türkiye. The ratio of our international students to the total number of students is approximately over 30 percent. This privilege environment provides our members, as stakeholders of a multicultural and exceptional network, with a rich culture, knowledge and experience sharing atmosphere. Similarly, more than half of our

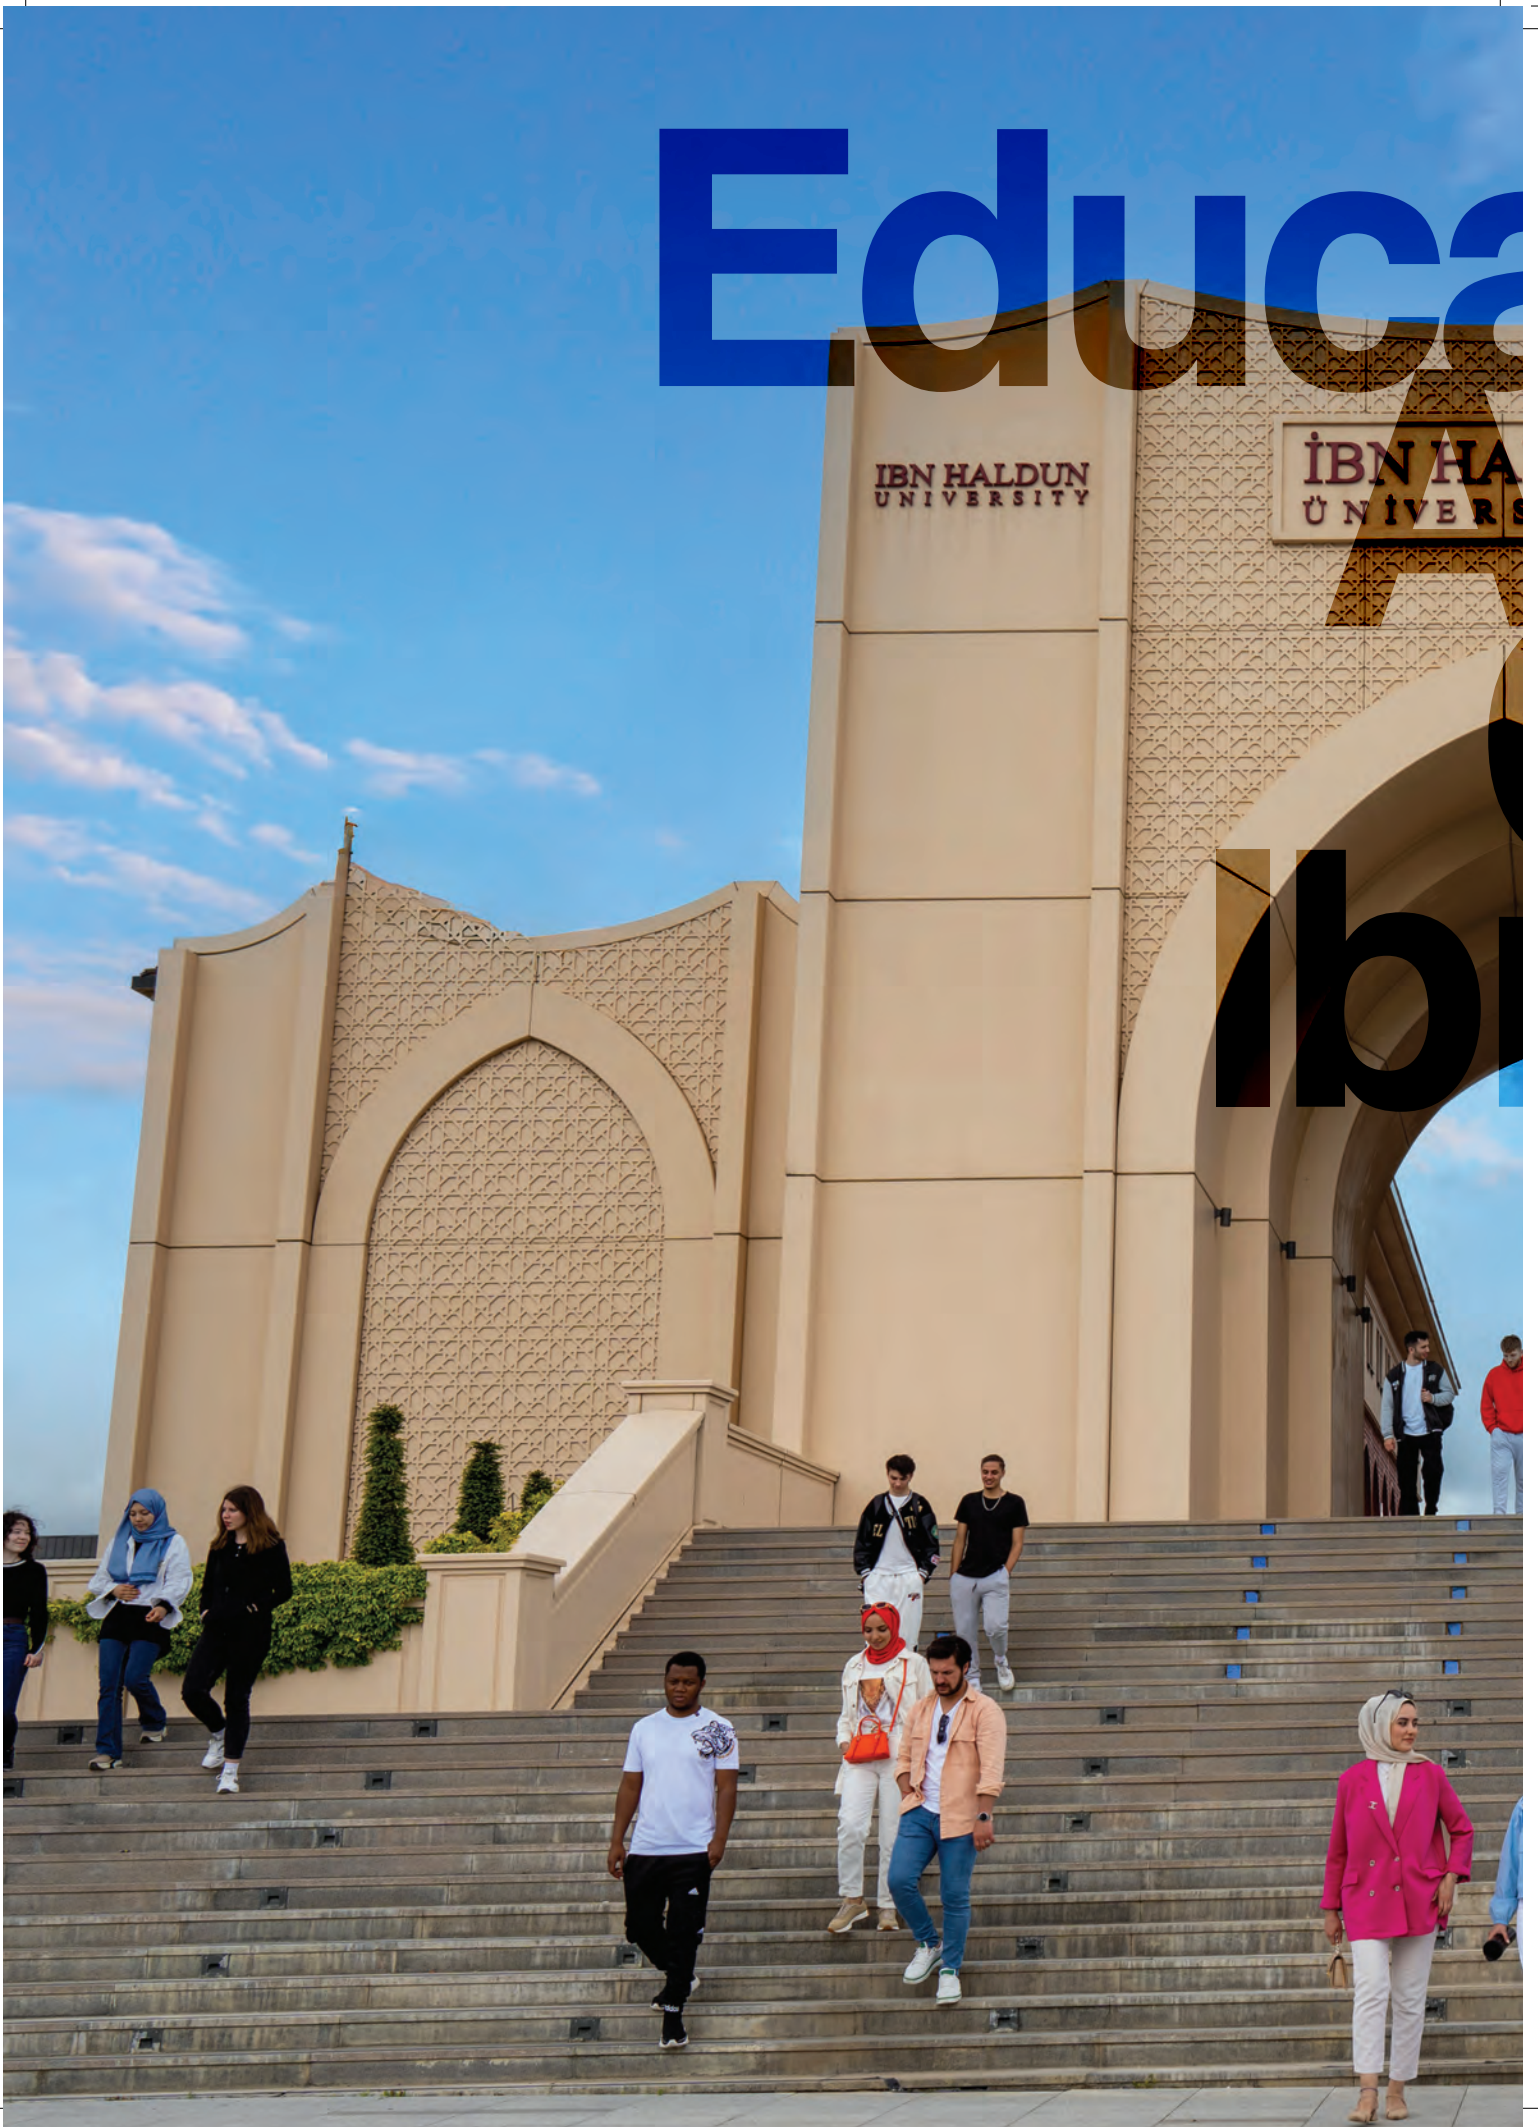

academic staff consists of faculty members who have studied abroad and completed their master's and doctoral education at prestigious universities around the world. Our university, convinced that building global relationships in business, academia, politics, and every field relies on the rich social capital acquired during university years, hosts a high-quality international learning environment, with distinguished students from over 80 countries and renowned academics in the field of social sciences.

ib

Education and Academic Career at Haldun

A Genuine “Foundation” University

At Ibn Haldun University, it is of utmost importance that our students are free from material concerns, and are focused on their education and academic development. At our University where most of 80% of our students continue their education under full exemption from tuition fees (full scholarship), we also provide a wide spectrum of in cash scholarship supports and assist our students in many other areas.

Multilingualism in Graduate Studies Policy

Ibn Haldun University considers reaching a certain level of proficiency in English, Turkish, and Arabic (or another language, excluding thesis-based Turkish programs and non-thesis programs) as a graduation requirement in its graduate programs. Students can fulfill the language graduation requirements either by receiving education in the Preparatory Program before their program or by successfully completing language courses during their program. Students who can demonstrate proficiency at the required level in these languages through exam results accepted by the University also fulfill the graduation obligation. The language proficiency level is determined by the Program Coordination.

Lecturer Nebahat Atas Jegham
School of Languages

A Social Sciences-Focused University

Ibn Haldun University is entirely focused on social sciences. In this framework, undergraduate education activities continue in Guidance and Psychological Counseling program under School of Education; Law program under School of Law, New Media and Communication under School of Communication; Islamic Sciences program under School of Islamic Sciences; Philosophy, Comparative Literature, Psychology, Political Science and International Relations, Sociology, and History programs under School of Humanities and Social Sciences, and Economics and Management programs under School of Business. At our University, where graduate studies are offered through our Institute of Graduate Studies and Institute of Alliance of Civilizations; we offer Ph.D. degrees in Psychology and Clinical Psychology; Ph.D. and Master's degrees in Philosophy, Economics, Management, Civilization Studies, Private Law, Political Science and International Relations, Sociology, History, Islamic Sciences and New Media and Communication programs; and master's degrees in Big Data and Business Analytics, Religious Sciences, Managing Educational Institutions, Artificial Intelligence Technologies in Education, Philosophical, Social and Historical Fundamentals of Education, Philosophy, Financial Economy, Air Transport Management, Public Law, Middle East Studies, Radio, Television and Cinema, Guidance and Psychological Counseling, Turkish Studies, and International and Comparative Law.

With more than 50% of the student population consisting of master's and Ph.D. students, our university places significant emphasis on research methods and techniques, at the undergraduate and graduate levels, as an integral part of education and training processes.

A Trademark in Language Education: IHU School of Languages

The School of Languages at Ibn Haldun University is one of the leading language schools in Türkiye, offering internationally accredited language education. Our university provides instruction in three languages: Turkish, English, and Arabic. In addition to these three languages, students have the opportunity to learn optional Eastern languages such as Japanese, Chinese, Persian, and Malay, which open the door to the accumulated knowledge of world civilizations, as well as Western languages such as German, French, and Spanish.

In the English Language Program, students receive world-class English education using the latest technological and pedagogical methods, taught by native English-speaking instructors. The Arabic Language Program uses modern methods to teach Arabic to non-native speakers, taking into account the rich heritage and tradition of the Arabic language while incorporating innovative approaches. The Turkish Language Program aims to provide participants with the necessary Turkish language skills for their daily lives and academic pursuits by combining theoretical and practical education.

Furthermore, the Language School plays a crucial role in enhancing the language learning skills of Türkiye's youth at all levels by offering certified training for foreign language teachers through "educator training" programs in collaboration with international institutions at the Teacher Academy.

At Ibn Haldun University, both preparatory classes and other language courses are conducted in small classes of 10-15 students, creating a personalized and intensive learning environment.

University Courses and Interdisciplinary Foundations

At Ibn Haldun University, all undergraduate students follow the same core curriculum under the umbrella of University Courses, where they take a series of mandatory courses in natural sciences, comparative methodologies, world and Turkish history, and world and Turkish art and literature. This practice of a core curriculum not only provides our students with a common and distinctive cultural foundation but also opens the doors to rigorous and analytical thinking.

Preparation for the Academic Career through Fellowship Opportunities

Our University, with its “Teaching Fellowship” and “Research Fellowship” possibilities, provides undergraduate and graduate students with strong opportunities for their academic careers while their education life continues. With this privileged model that is successfully implemented at Ibn Haldun University, like the prominent universities of the world, our students can actively participate in the education and research processes while they continue their studies, and acquire unique experiences for their academic careers. Furthermore, teaching fellows and research fellows benefit from significant financial possibilities.

Double Major (DM) and Minor Programs

At İbn Haldun University, students who meet the necessary requirements have the opportunity to transfer to another department within the same or a different School and graduate from that degree program. Furthermore, our students can benefit from the Double Major (DM) Program, allowing them to obtain an undergraduate degree from a second major, or the Minor Program, enabling them to earn a minor certificate from another department. Simultaneously, our students have the following options:

1.They can enroll in both a Double Major and a Minor Program, and upon successful completion, graduate with a degree from two majors and a minor certificate from one department.

2.They can enroll in two Minor Programs and graduate with a degree from one major and two minor certificates from different departments.

Our university, which offers an encouraging basis for the double major and minor programs, is among the top universities in our country, in terms of the rate of student that benefit from this opportunity.

One-on-One Education

İbn Haldun University is a boutique university where a distinguished group of academics meet qualified students in graduate and undergraduate programs with 10-20 student quotas, and education environments are designed for a one-on-one education, mostly in small classrooms. Our University, with a "Student / Academic" ratio is 5, is among the top universities of Türkiye in this regard. This allows for education, research and academic counselling and project processes are pursued in a way that each student may discover their own potential and put it into motion under the guidance of our academics.

Alliance of Civilizations Institute

Skills and Competency Orientation & Innovative Learning and Teaching

Curricula shaped according to current needs, an approach focused on enhancing students' skills and competencies, and the adoption of innovative learning and teaching processes are distinguishing features of Ibn Haldun University. In our University, all academic and non-academic processes are designed to enhance participants' skills and competencies in their respective fields, and they continue to be revised based on feedback received to meet the current needs of the era.

Artificial Intelligence-supported activities strongly reinforce this aspect; and both our faculty members and students gain the ability to effectively utilize contemporary instructional tools, thereby making significant progress towards maximizing the outcomes of the education process.

International FIBAA Accredited Programs

FIBAA, an EU-based international organization which evaluates and accredits higher education programs particularly in the social sciences domain, accredits universities and colleges all around the world after a rigorous evaluation process, under the following criteria:

- Quality Assurance
- International Recognition
- Competitive Advantage
- Continuous Improvement
- Raising the Educational Standards
- International Collaboration and Exchange Opportunities

Ibn Haldun University is among the few universities of Türkiye, with 18 undergraduate and graduate programs accredited until 2029.

Opportunity to Receive Education Abroad

Ibn Haldun University, through its partnerships with stakeholders in various parts of the world, has signed academic and student exchange agreements, providing students with the opportunity to pursue a portion of their education in different countries. This allows our students to engage in intensive language practice, receive academic education, and simultaneously enhance their global awareness.

Dr. Taha Burak Toprak
Department of Psychology

Summer Schools

Summer Schools are a significant indication of Ibn Haldun University's status as an international hub, attracting qualified students from around the world each year. The Ibn Haldun University Summer Schools, led by esteemed professors in their respective fields, have been steadily gaining recognition and progressing towards becoming a reputable brand, thanks to their rigorous curriculum and rich content.

For detailed information and application procedures regarding academic summer schools, you can visit the website (summer.ihu.edu.tr).

In addition to academic summer schools, our university also organizes summer schools open to participants of all ages, particularly targeting the youth, in various fields. Participants of these summer schools have the opportunity to benefit from the diverse facilities provided by Ibn Haldun University Campus.

Prof. Selim Zaim
Department of Management

Rankings

Ibn Haldun University has proven its quality in terms of its level of education and the facilities it provides, despite its young age. Our University, ranking among the most preferred universities based on its programs in the YKS rankings, has succeeded in ranking among the top 10 universities in our country in various fields, as per the reports issued by many official and respected institutions.

In the reports issued annually by Higher Education Council (YÖK), titled “University Monitoring and Evaluation General Report” and similar reports, our University ranks high among all universities in our country under many criteria, particularly;

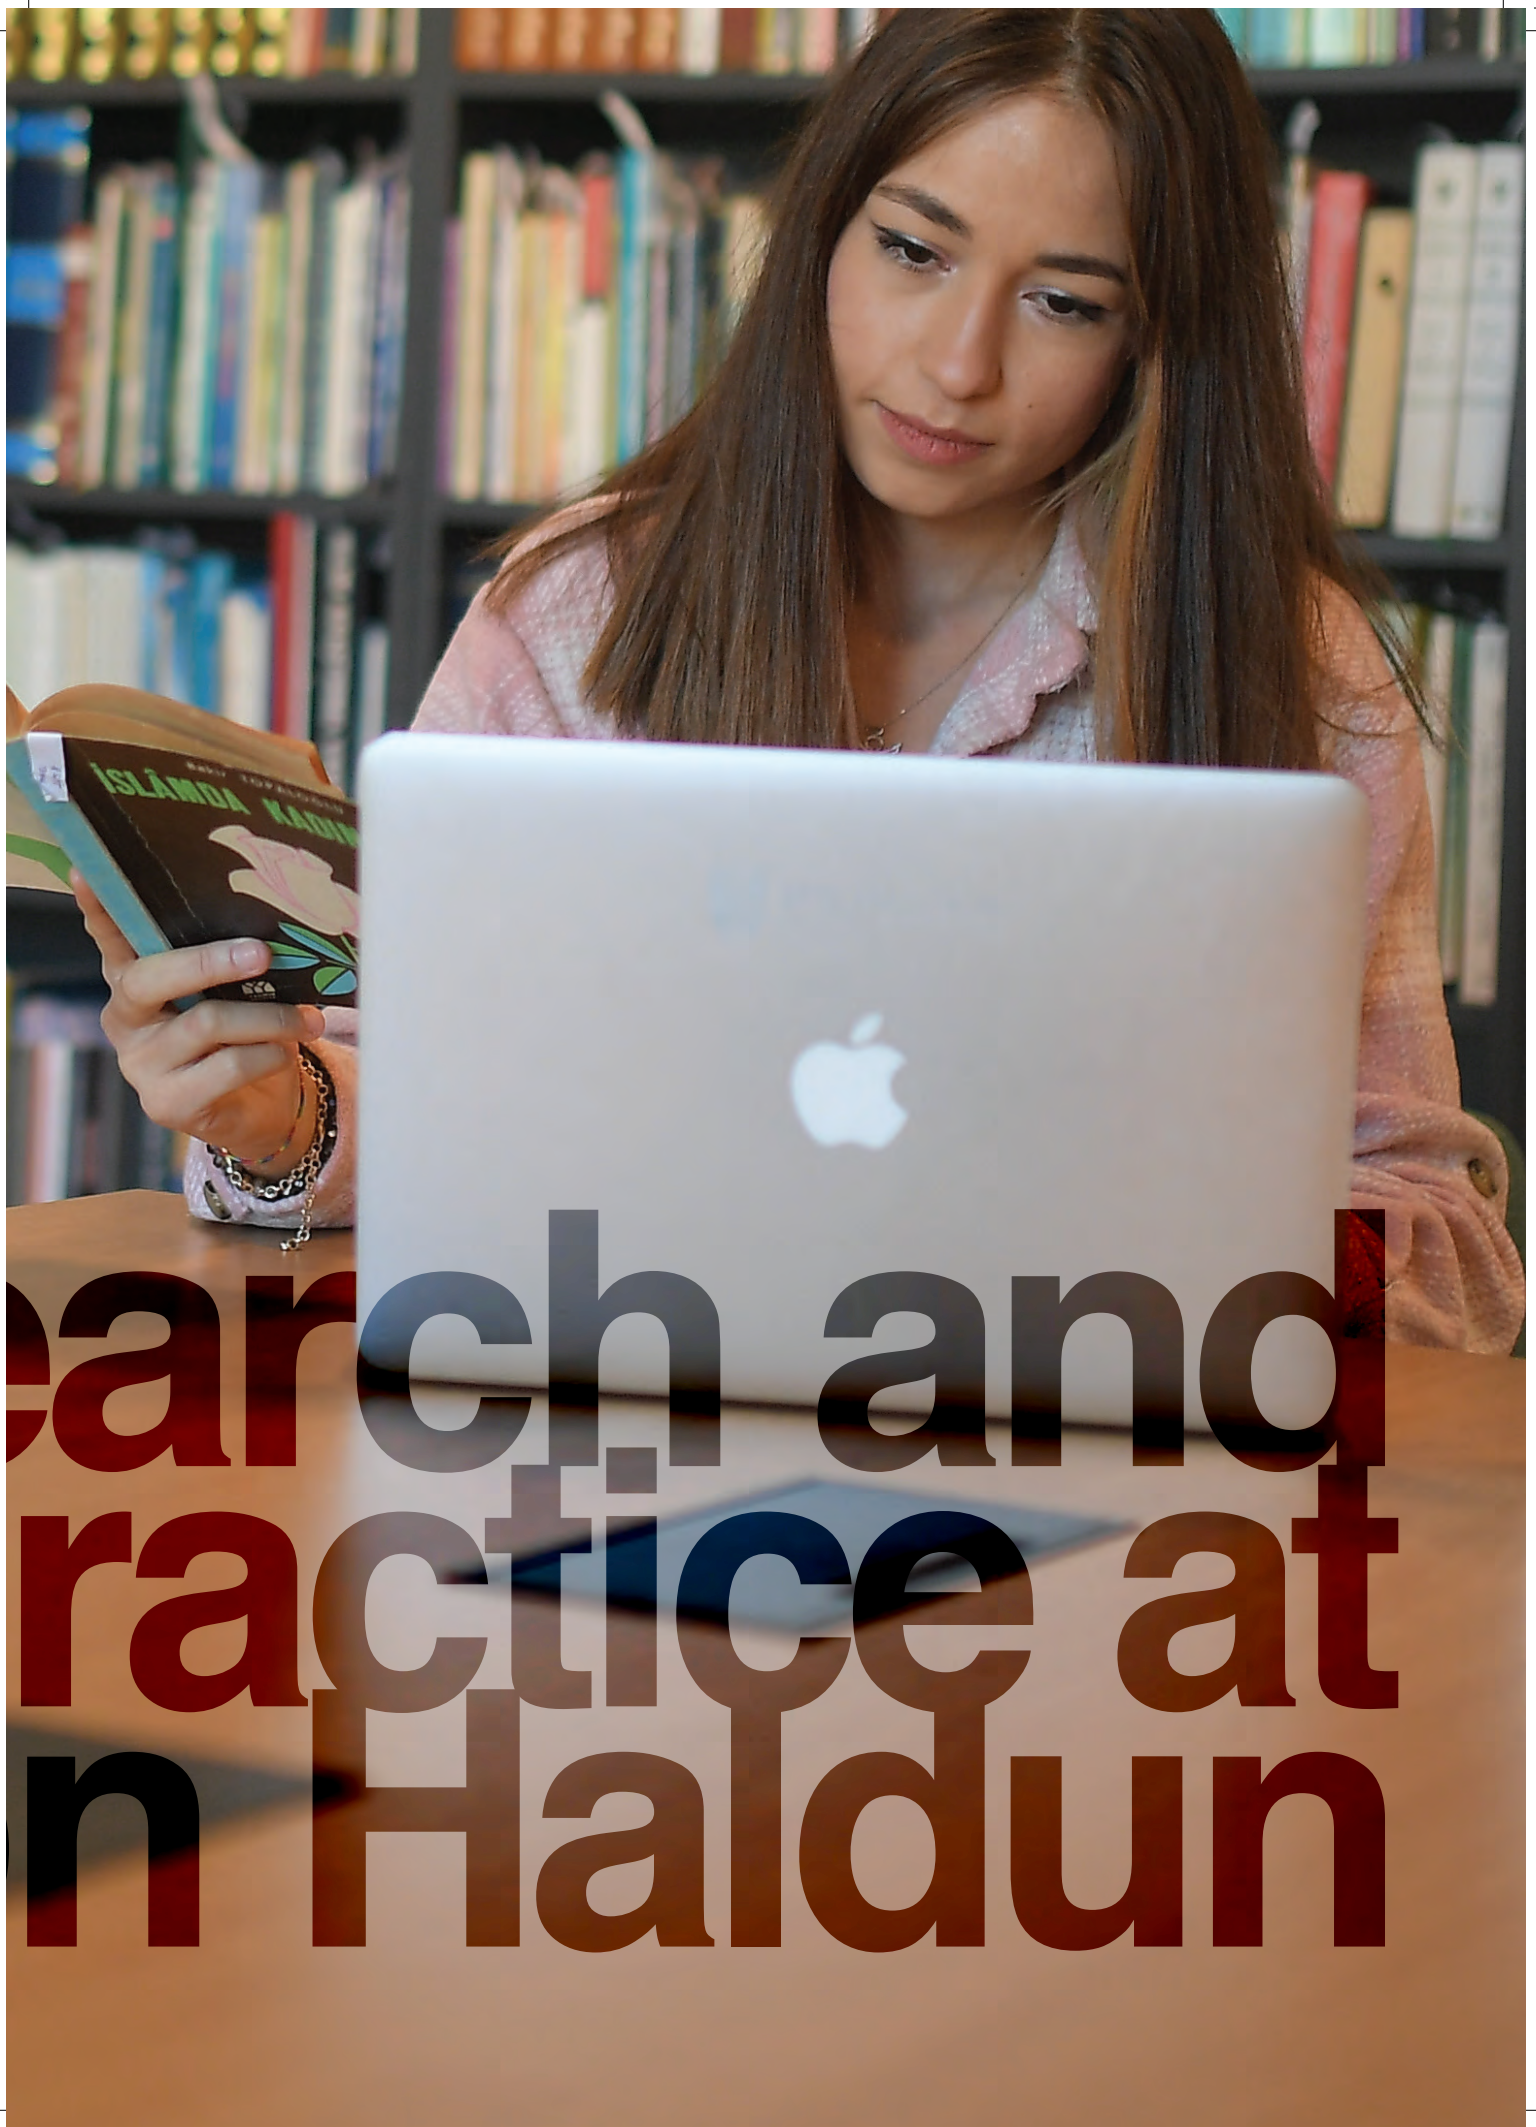

- Quota occupation rates,
- Current expenditures made per student,
- International student rate,

Research and Practice at Haldun

Research Centers

Ibn Haldun University, with its research centers, prioritizes quality intellectual production by providing rich research opportunities. It aims to generate solutions to national, regional, and global issues through practical opportunities and to create lasting values for the future. In this regard, our research centers initiate and carry out research projects in various fields and disciplines, provide professional expertise and consultancy services for these projects, and foster collaborations with public institutions, private sector, NGOs, and international organizations.

The following are the research centers currently active within our university:

- Center for Conflict Analysis and Peace Studies
- Center for Ethics Studies
- Center for Hadith Studies
- Haydar Aliyev Eurasian Studies Center
- Center for Islamic Economics and Finance
- Center for Debate and Argumentation Ethics
- Center for Psychotherapy
- Center for Guidance and Psychological Counseling
- Center for Civil Society Studies
- Center for Oral History and Social Memory
- Center for Continuing Education
- Center for Saving Finances
- Center for Turkish Language Instruction
- Center for International Law and Human Rights
- Center for Dispute Resolution

Vibrant and Encouraging Project Ecosystem

Ibn Haldun University has a vibrant, active and encouraging project climate and ecosystem. Project development processes for the national and international grant programs, as well as support for the academic activities and establishment of project partnerships are carried out by the Project Support Office, for our academics and students. Support and counseling services are provided in this regard. Besides trainings project management, funding resources and application processes are also offered at our University. These trainings contribute to enlarging the researcher network and increasing the scope of collaborations.

Rich Library

The Library is designed in a hybrid format that blends the past and the future, following international standards. It provides an ideal working environment with individual and group study rooms, a seminar hall, an e-library, and a book café. It has a collection of over 550 million reliable resources, consisting of printed and electronic works.

The inspirational study areas of the library and its innovative services assist users in attaining their academic goals. It has a rich and distinguished collection, consisting of Turkish, English and Arabic works. They include books in various types, primary sources and reference sources.

The Library obtains the resources that are not listed in the collections but its users need, through subscriptions, purchasing, donations, and borrowing from other libraries, in a timely manner, and with the best possible means of access. It utilizes the collections of all universities and research libraries in Türkiye, through agreements made with them, and makes available its own collections to researchers who need them. Beside the standard library services, it supports researchers through regular training on research methods and techniques, academic profiling and reference management systems.

Library services are available 24/7 at its three-storey stand-alone building at the entrance of the campus, and it possesses 2,488 square meter closed space, and 2,824 meter shelf length.

Qualified Publishing Activities

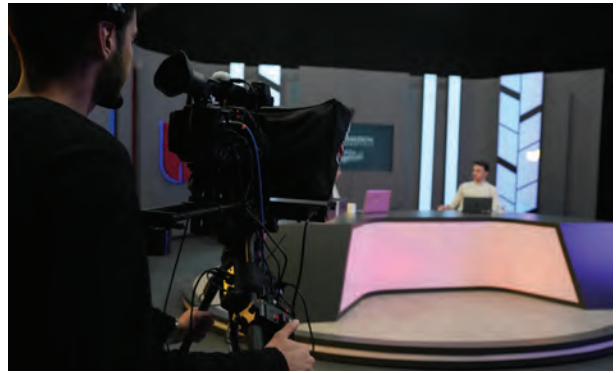

Ibn Haldun University Publications make unique contributions to the world of knowledge and wisdom by publishing prestigious works in three languages. With the aim of creating a distinguished library for discerning readers, the publishing house brings together the invaluable works of scholars from our university, as well as various other universities and the papers presented at symposiums held within the university. In addition to these collections, the publishing house also presents valuable treasures from the Turkish-Islamic civilization that shed light on both the present and the future.

Operating under the umbrella of the publishing house, Iber Publications makes significant contributions to the world of knowledge with the motto "Only Our Classics." Iber Publications offers a wide range of publications, primarily focusing on the works of Ibn Haldun, after whom our university is named, as well as various fields of study.

Places Where Theory and Practice Are Intertwined

Education-training and research processes at our University are conducted in a way that theory and practice are intertwined, to the extent that the undergraduate and graduate programs require practical applications. In this framework, supplementing the theoretical knowledge of our students with high level practical skills and competencies is of great importance.

In this regard;

With its large studio spanning across 412 square meters, equipped with modern production devices, and video mixing, video editing sets, audio recording and guest rooms, our **Media Center**, meeting the curricular and extracurricular production needs of our students where they merge theory and practice, as well as providing support to our academic and administrative departments;

Our **Psychotherapy Application and Research Center (IPAM)** providing psychotherapy services in Turkish and English in a wide scope including individual therapy, couples and family therapy, game therapy and group therapy, with experts in their fields, in order to improve the well-being of individuals, families and the community; equipping its therapists, particularly our graduate students from the field, with professional skills, and standing out with its activities focused on social benefit,

BISTLAB, as the hub of simulations, application and trainings which improve the financial literacy among our members, particularly within the Financial Economy, Management and Economy departments, continuing its activities with a view to contributing to the sustainable development of our country and to ensure that everyone gets their fair share of this development,

are among the main areas of practice with extensive infrastructure, where we offer theory and practice together. Besides, activities carried out in the psychology laboratories as well as the law clinics and research centers at Ibn Haldun University, offer a unique education environment where theoretical knowledge is cemented with application.

Undergraduate Programs

Undergraduate Program

Philosophy and Artificial Intelligence (English)

The Philosophy and Artificial Intelligence undergraduate program aims to train students as the “philosopher–AI specialists” that the age requires, equipping them with both technical and conceptual skills. The curriculum offers core philosophical fields such as ethics, epistemology, and philosophy of mind together with technical subjects including artificial intelligence, machine learning, natural language processing, and data analysis, presented through an integrated approach. As the impact of AI on individuals, societies, and ethical values grows, this program seeks to combine philosophical reflection with technological development to produce human- and civilization-centered solutions. Graduates will be uniquely positioned to contribute to emerging fields such as cognitive science, AI ethics, philosophy of mind, and technology policy. The program also provides opportunities for deep specialization in both philosophy and computer science.

Undergraduate Program

Law (30% English)

The School of Law at Ibn Haldun University employs interactive and comparative teaching methods, incorporating both traditional and innovative approaches, as well as utilizing the opportunities provided by technology. The School fosters an education approach that encourages active student participation with a small number of students, introduces them to primary sources prior to class, promotes critical thinking, and instills a research-oriented mindset during undergraduate education. Furthermore, practical courses are offered beside theoretical ones; legal clinics and mediation clinics are established and participation in national and international moot court competitions are ensured to enhance their practical skills.

Undergraduate Program

Economics (English)

The Department of Economics at Ibn Haldun University aims to educate individuals who possess a comprehensive understanding of global economies, and who can analyze existing problems. The Graduate Program on Economics, which has been developed in line with this perspective, provides the opportunity for students to deep-dive into the economic phenomena, through AI-supported analysis methods. Our students gain competitive skills in this process and begin their working life one step ahead of their competitors.

Undergraduate Program

Islamic Studies (%30 English)

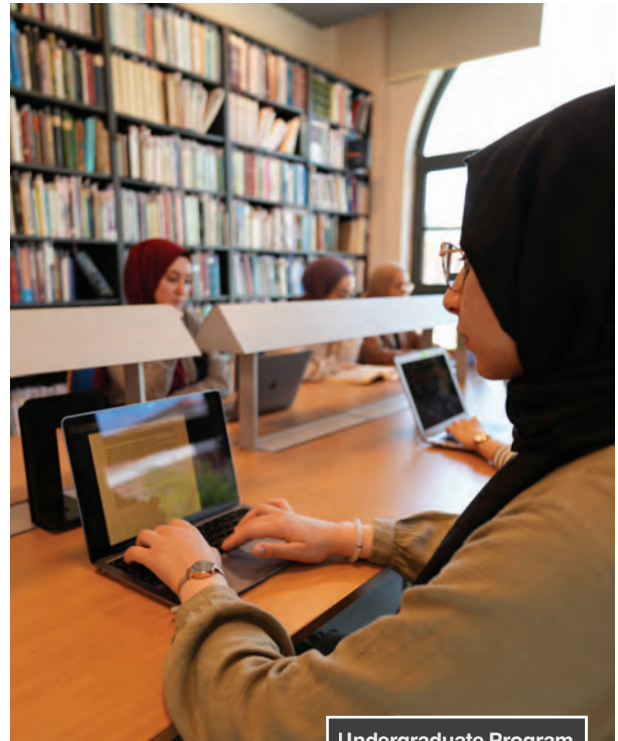

Islamic studies, with its deep-rooted history, has formed a powerful harmony between reason and revelation, physics and metaphysics has been established. However, in the modern era, this harmony has been disrupted, leading to the emergence of various religious, legal, theological, social, psychological, and other problems that were previously non-existent. Addressing these problems requires finding solutions that restore harmony and closeness between religion and this world, and conducting deeper and qualified research in the field of Islamic studies in this regard. Upon graduation from the Islamic Studies School of Islamic Sciences with proficiency in three languages, having completed a comprehensive curriculum that covers a wide range of subjects, students will be equipped to pursue academic research and also have the opportunity to work in education, religious services and spiritual counseling etc.

Undergraduate Program

Management (English)

Management undergraduate program has been carefully designed to ensure that students acquire the necessary intellectual background and practical skills for leadership in the global business world. The first year of the program aims at equipping students with a wide intellectual framework through many multi-faceted courses such as history of the world and Türkiye, arts and sciences. Beside the compulsory courses, the wide spectrum of electives offered in fields such as finance, marketing, strategy and human resource, allows for the students to deepen their knowledge in their academic and professional areas of interest. With the rich opportunities it offers, the program has been meticulously structured for both the students that seek academic careers and those in search for leadership in the business world and aim to become successful in the dynamic and competitive environments.

Undergraduate Program

Comparative Literature (English)

The vision of the Department of Comparative Literature is to generate knowledge and create awareness about the fluidity of civilizations by comparing works written in European and Middle Eastern languages, and Turkish literature. The Department of Comparative Literature not only allows us to gain knowledge about different cultures but also equips students with comparative evaluation skills, enabling them to apply this interdisciplinary and comparative approach to different fields. Based on a critical perspective, the Department aims to closely follow developments in literature, language, culture, and cinema, and to educate scholars who will contribute to discussions in these areas.

Psychology (English)

The Department of Psychology aims to establish a distinctive tradition at the national and international levels, positioning itself within the top 10 in psychology education and research in Türkiye, and among the top 100 internationally. The department's vision is to cultivate psychologists who are virtuous, constructive, and creative thinkers, capable of self-reflection, valuing democratic principles, respecting rights and freedoms, free from prejudices related to race, gender, or religion, committed to lifelong learning, making original contributions to the field of psychology without alienating themselves from the values of their society, possessing a rational and scientific orientation, diligent, and possessing a sense of esteemed citizenship. The department is dedicated to training psychologists who are committed to making significant contributions to the psychological, moral, spiritual well-being, and overall quality of life of individuals within society.

Guidance and Psychological Counseling (English)

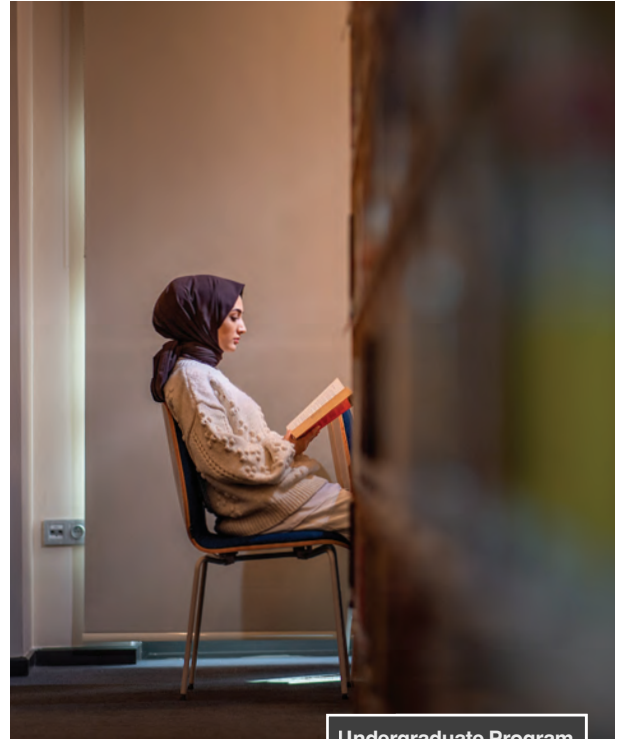

The teaching policy of the Department of Guidance and Psychological Counseling at Ibn Haldun University is to explore, utilize, and enhance an alternative counseling model that emerges through intercultural interactions. This is because the world is undergoing rapid change and transformation, and individuals are significantly influenced by this rapid change. The need for guidance counselors and psychological counselors who can meet all these societal needs, understand the contemporary world, and provide practical solutions to the problems of students, teachers, and parents is increasing day by day. Within the program, students prepare for the profession by taking various courses that provide both theoretical knowledge and practical applications in the field, as well as intellectual competence that comes with university life.

Undergraduate Program

Political Science and International Relations (English)

The Department of Political Science and International Relations is designed as a research-oriented department. Aimed at educating future leaders and academics in the field, the department positions its students as active members of the teaching and research community, promising to provide them with the necessary knowledge and expertise required by this position. Moving beyond Eurocentric pedagogy, the department engages in comparative studies of different cultures and civilizations, addressing the political issues faced by Türkiye in regional and global contexts. Special efforts are made within the program to provide students with field and regional experiences and opportunities to learn different languages.

Undergraduate Program

Sociology (English)

The Department of Sociology aims to critically analyze existing systems of thought in a deep and comprehensive manner in order to construct a new epistemological, ontological, and methodological framework to instill intellectual independence at both individual and societal levels. Its goal is to educate students who adopt a critical approach, benefit from historical knowledge, understand the spirit of the times, and develop strategies accordingly, while remaining open to new ideas, methods, and concepts, with an interdisciplinary perspective. The program aims to introduce students to the basic concepts and debates of sociology and develop their ability to analyze local and global issues from a sociological perspective.

Undergraduate Program

History (English)

The History Undergraduate Program at IHU has a wide and universalist vision. With its strong faculty, History Undergraduate Program can offer 15-20 courses each semester, out of its rich pool of courses. This spectrum covers Ottoman Turkish, Arabic, Persian, Ancient Greek, Latin and Classical Armenian languages; world history and world methodological principles, Ancient Greek, Roman, European Middle Ages and Modern Türkiye histories. This unique curriculum not only forms a solid basis for master's and Ph. D. studies, but also equips its graduates with the analysis-synthesis skills and flexible options which are of vital importance in terms of embarking upon the working life. Our students can fill a their elective courses as they wish, to diversify their intellectual horizons. IHU History Undergraduate Program ranks among the top among the student preferences in Türkiye.

Undergraduate Program

New Media and Communication (English)

The Department of New Media and Communication is structured as an integrated program that encompasses all sub-disciplines of the communication field. The department offers educational programs related to the two different areas of communication: media and marketing communication. After completing core communication courses, students have the opportunity to specialize by taking elective courses in either the media field or marketing communication field. Today, the use of new media or social media tools, along with customer relations management define the competitive advantage in the branding of countries, cities and production. The Department of New Media and Communication has been designed in response to this need.

Master's Program with & without Thesis

Big Data and Business Analytics (In Turkish)

The Master's Degree Programs in Big Data and Business Analytics aims to provide general knowledge and skills on how to process big data in a manner that enables optimal decision-making, increases productivity, and reduces costs, and to teach fundamental concepts and tools used in data analytics. The students also acquire skills to effectively use data analytics technology and decision support systems effectively to address real-world problems encountered in the business environment, and graduate after developing a unique skill set that are in high demand in today's data-driven business world.

Master's Program with Thesis

Religious Studies (30% English)

The Religious Studies Master's Program aims to focus on the history, social and psychological dimensions of religion, to carry out current studies in its field and to train students in this direction. The program offers education in three main areas, which are the history of religions, the psychology of religion and the sociology of religion. In line with the interdisciplinary goals, the program, considering that sociology of religion cannot be separated from general sociology, just as psychology of religion cannot be separated from general psychology, and history of religions from history, philosophy and philology; students who are working towards identifying the current problems and producing solutions for them, and to acquire original ideas on religion, philosophy and social sciences in the broader sense.

Master's Program with Thesis

Managing Educational Institutions (Turkish)

The aim of the Master's Program in Managing Educational Institutions is to educate leaders who can identify the strengths and weaknesses of educational institutions, work towards improving their shortcomings and errors, and develop effective and innovative educational systems that encompass all students. The program offers an exciting learning experience that combines theory with practice and aims to empower students with the skills to lead change, people, and learning in schools, universities, and other educational institutions. Within the program, students are provided with the opportunity to engage with distinguished experts in the field and benefit from their knowledge in solving various problems encountered in educational institutions management.

Master's Program with Thesis

Artificial Intelligence Technologies in Education (Turkish)

Artificial intelligence tools and applications affect and transform industries, societies and education systems. This transformation calls for training experts who can utilize artificial intelligence technologies in an effective, efficient and appropriate manner, and to carry out R&D activities. The Artificial Intelligence Technologies in Education Master's Degree Program with Thesis, which is the first program in this field in Türkiye, is an interdisciplinary program aiming at conducting analyses for utilizing artificial intelligence in education-related fields, examining the existing examples and practices, defining the problems, developing solution proposals and products, and training experts that are competent in these areas.

Master's Program with Thesis

Philosophical, Social and Historical Fundamentals of Education

(30% English)

The Master's Degree Program in the Philosophical, Social, and Historical Fundamentals of Education strives to establish a new ground for research with educational experts who can examine the historical, philosophical, and social foundations of national and international educational systems and evaluate contemporary educational perspectives. On the strong interdisciplinary ground that it provides, the program educates graduates who can approach the fundamental issues of education with a philosophical, social and historical perspective, with a sophisticated interpretative, normative and critical thinking on education, and who can contribute to the formation of the educational thinking of the society that they are living in, in line with the universal values and future trends.

Ph.D. & Master's Program with Thesis

Philosophy (English)

Ph.D. and Master's Program in Philosophy takes a non-Eurocentric approach by examining both Western and Islamic philosophy in their historical contexts and interactions, aiming to provide students with a universal perspective. The program offers a pluralistic curriculum that draws from traditions of Western philosophy based on Ancient, Islamic, Turkish, and Western philosophy, and brings together the theories and perspectives that emerged in the history of philosophy, in consideration of the classical and modern discussions. With the multi-faceted formation it offers, the main objective of the program is to train academics who can study the tradition of Islamic philosophy not only as a historical phenomenon but also within the context of contemporary philosophy, providing a versatile formation.

Master's Program with Thesis

Financial Economics (English)

Financial Economics Master's Program with Thesis aims to produce graduates who can combine theory and market, produce alternative paradigms and solutions, through courses, practices and theses to be conducted by an experienced staff who are both academically strong and have worked in financial markets for many years. Ph.D. & Master's Program with Thesis

History (English)

IHU Department of History falls within the universal main culvert of the practice of historiography. The vision of the department involves transcending both the Wes-centric and narrow Ottoman-Turkish focused approaches. The goal of training the students of master's and Ph. D. students as experts of the Ottoman and Modern Turkish History falls within this framework. Thus, both programs attach great importance to the education of World History and General Historiography. On this basis rise (a) conference lectures and (b) research seminars that require working on primary sources and research seminars that can teach, regarding the various periods and issues of the Islamic, Middle East and Ottoman histories. Moreover, graduates of the program are foreseen to offer lectures both at undergraduate and graduate levels in Türkiye and all around the world, in the fields of History of the Turks, Ottoman Turkish Ottoman History, Modern Turkish History and Turkish Historiography, and oversee master's theses as well as Ph.D. dissertations in these fields, and serve in thesis juries.

Ph.D. & Master's Program with Thesis

Islamic Studies (30% English)

The aim of the Ph.D. and Master's Programs in Islamic Studies is to develop Islamic studies in Türkiye and all around the world, and to contribute to the academic world through such research and to widen its circle of impact. Another main goal of the program is to train qualified academics who are capable of producing real solutions, having identified the basic problems correctly. Having embraced an interdisciplinary approach, the Program offers education in Süleymaniye Madrasah, which is one of the most prestigious higher education institutions of the Ottomans, with a master-apprentice style relationship, and to train effective and qualified academics for the future world.

Master's Program with Thesis

Turkish Studies (English)

Türkiye is an important country in the world and its profile is constantly improving. The Master's Program in Turkish Studies has been established upon an interdisciplinary approach, encompassing components such as language (Modern Turkish and Ottoman Turkish), history, economics, political science, sociology, and anthropology. While the mentioned disciplines focus on only one aspect or dimension of the Turkish reality, Turkish Studies aims to examine and grasp Türkiye with a deeper and holistic manner. The program not only serves as a solid basis for Ph.D. studies in history, sociology and political science but also provides its graduates, either Turkish citizens or internationals, the opportunity to work and pursue their careers in all kinds of private and public institutions, multinational companies and national/international NGOs.

Master's Program with Thesis

International and Comparative Law (Turkish)

The Master's Program in International and Comparative Law is designed as a postgraduate program that approaches private and public law disciplines from an international law perspective, independent of the classical distinction between private and public law. In the courses, students are encouraged to apply the knowledge and competence they gained during their undergraduate studies to conduct multilingual and international comparative law research. In the program, legal professionals with developed analytical skills, accurately diagnosing international legal problems, developing rapid and goal-oriented solutions, and equipped with the knowledge and expertise to represent Türkiye on the international stage.

Ph.D. & Master's Program with Thesis

New Media and Communication (English)

Ph.D. and Master's Programs in New Media and Communication aim to provide theoretical knowledge and practical applications in the field of New Media and Communication to meet industry needs and expectations, as well as academic needs. Through its extensive studio infrastructure, the program offers theoretical insights alongside hands-on practical applications. The program covers current media and communication theories, research principles, methodology required for the field of communication, digital communication, topics such as culture and society, as well as practical applications that address sectoral needs and expectations. This is all presented in conjunction with the theoretical background within the context of the historical development of media.

A photograph of a meeting with several people. In the foreground, a person wears a brown hijab and a tan vest over a white shirt, with their hands clasped. To their right, another person in a black hijab and floral-patterned black dress sits at a desk with a laptop. In the background, a person in a black abaya is gesturing with their hand. A woman with curly hair is visible on the left. The room has large windows with a decorative brown lattice railing. The text "Academic Team" is overlaid in the bottom left.

Department of Philosophy

Academic Team

Ibn Haldun University has a distinguished academic staff in all fields of social and human sciences, who are competent in their respective areas with their publications and high-level education and expertise on an international scale. The educational environment, with a ratio of 1 academic staff member to every 5 students, positions our university in a unique position in Türkiye, enabling our esteemed academic staff to provide individual attention to our students and assist in their academic development.

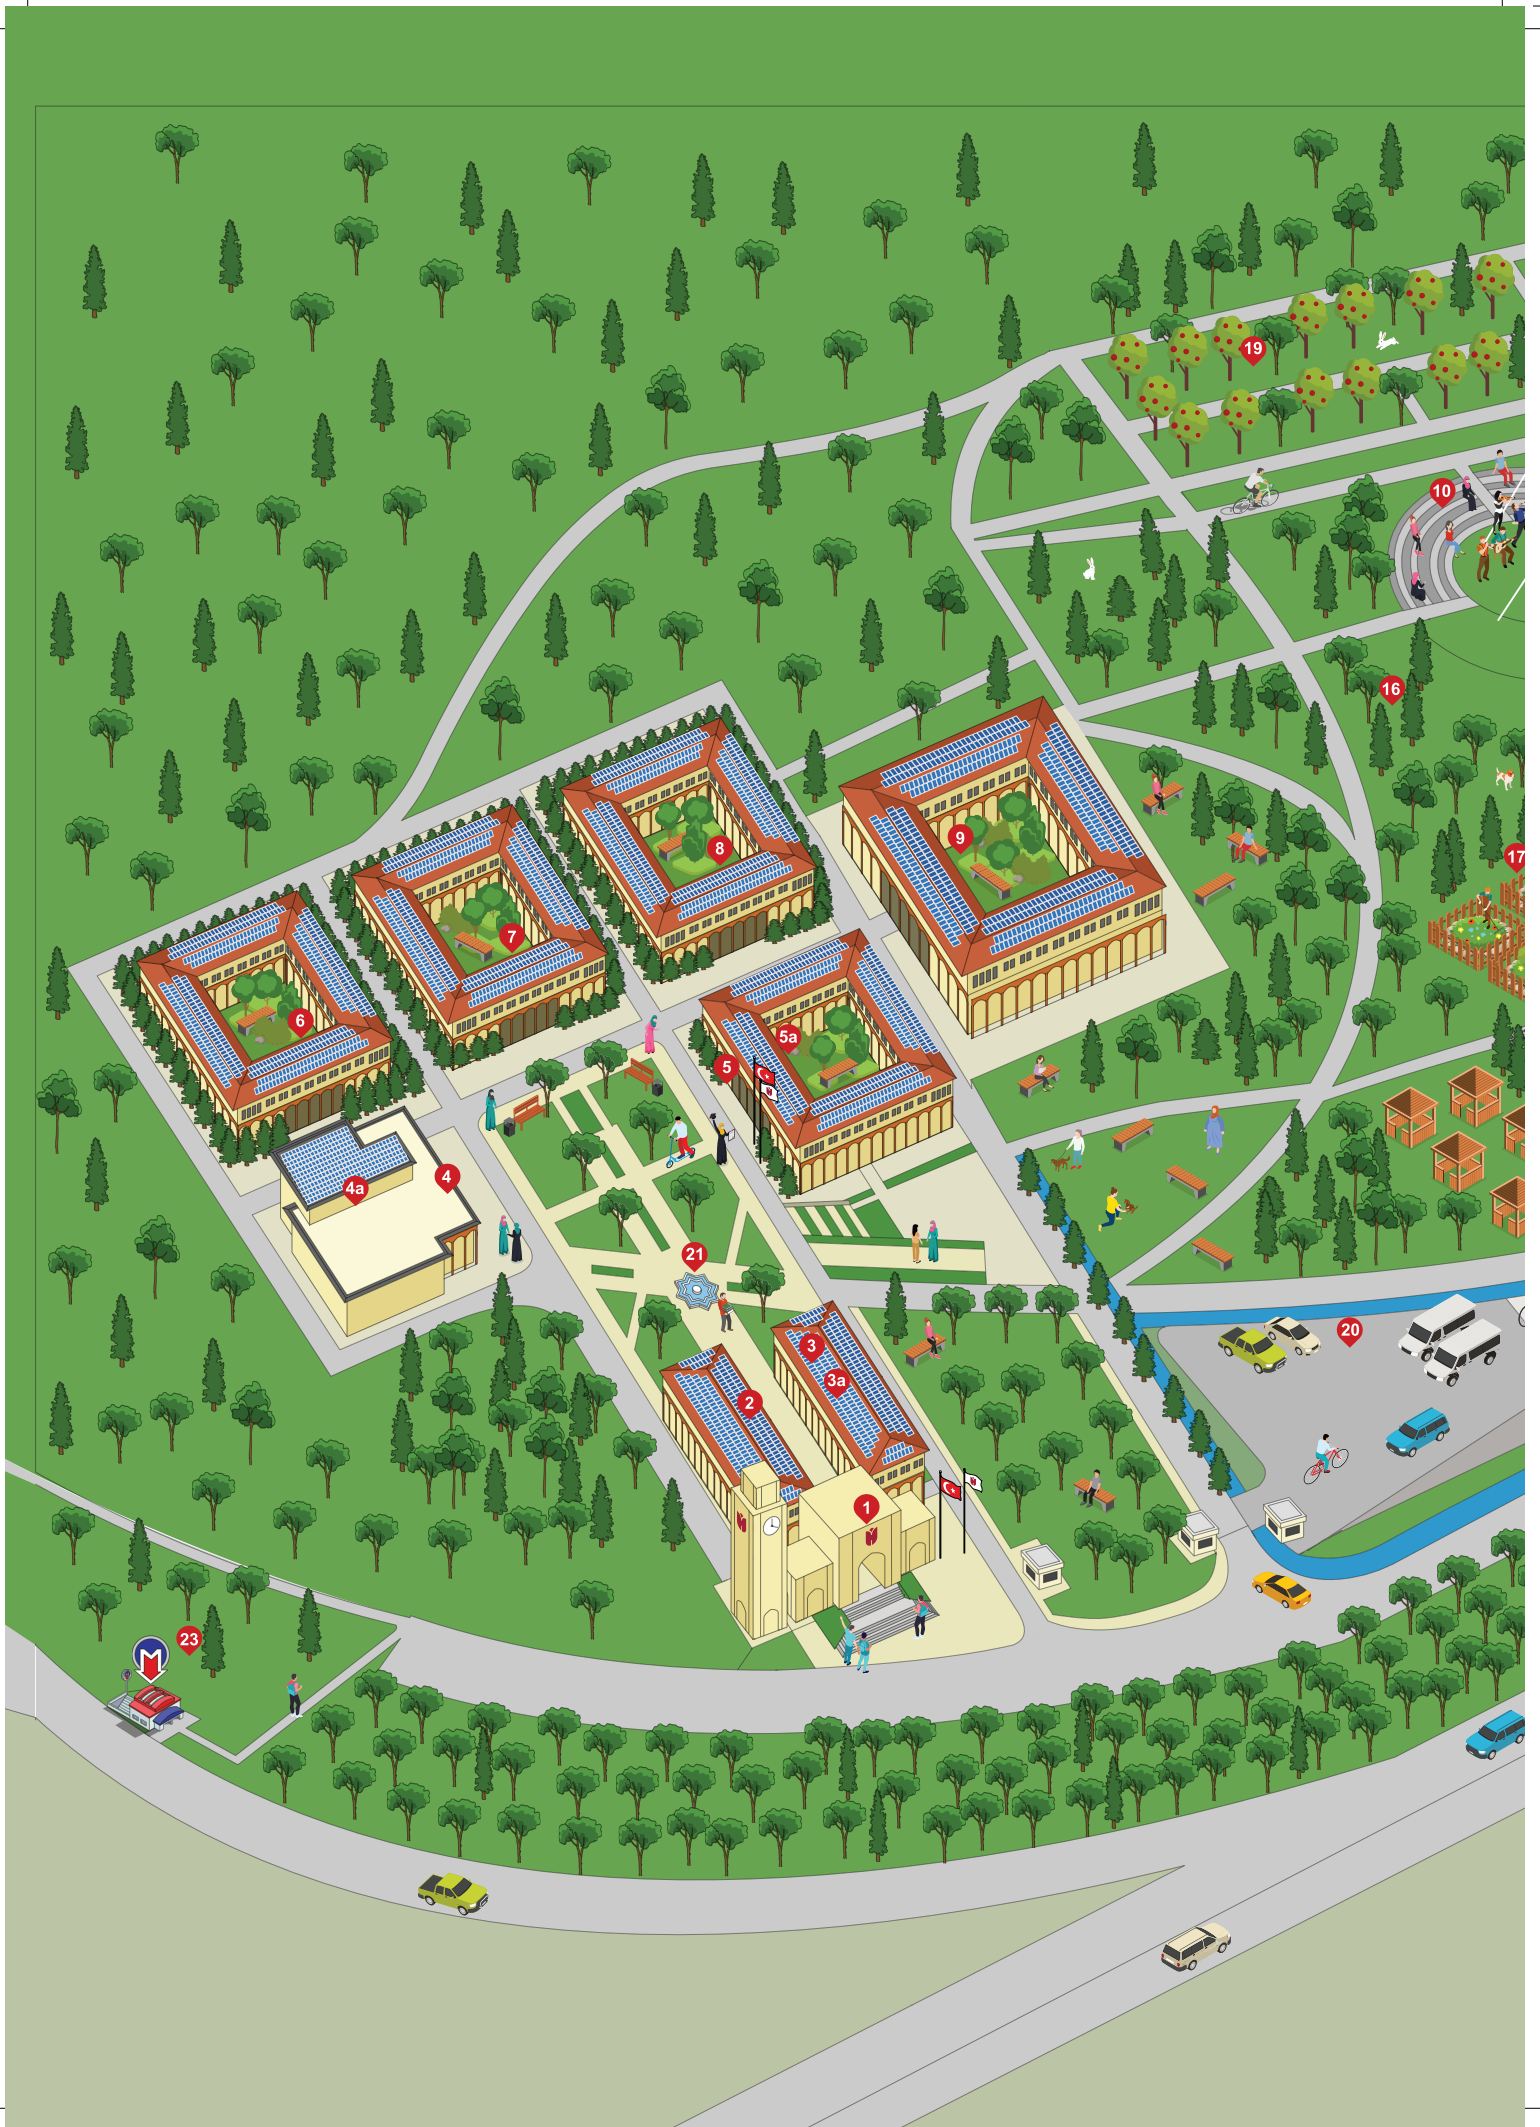

As a “boutique” university, Ibn Haldun University truly deserves this description with its limited number of undergraduate and graduate quotas and its focus solely on the social sciences in terms of education, teaching, and research infrastructure. In this aspect, our university stands out as an esteemed institution of higher education in Türkiye where one-on-one teacher-student relationships are highly valued. In line with current education and course planning, this academic staff is reinforced and strengthened with competent individuals from outside the institution through alternative employment channels in each academic semester.

To get to know our current academic team who serve in our schools, departments, and institutes and to examine their academic profiles closely, please visit our dedicated page on our website:

Transportation

Ibn Haldun University provides free shuttle service from the university campus to various central points in the city, depending on usage and demand.

The Ibn Haldun University Station of the Halkalı-Istanbul Airport Metro Line, which is currently under construction, is located 700 meters away from the entrance building of our campus. Additionally, the Ibn Haldun University bus stop, located at the main entrance of our campus, is on the route of local buses.

Our Süleymaniye Campus in Fatih and Taş Mektep Campus in Bakırköy, on the other hand, are centrally located and are situated along the routes of the metro, tram, Marmaray, and bus transportation systems.
